**BUILT TO WORK FOR YEARS.
NOT SEASONS.**

At River Creek Farms, more than 50 years of experience selling bulls has taught us that durability is what separates theory from reality. Our bulls are built to hold up, built to stay sound, and built to work in real-world conditions. We calibrate our genetics to give our customers the greatest benefits from crossbreeding, maximizing calving ease, disposition, fertility, growth, and stayability over time.

We stand behind every bull that carries our brand because we know what works, and we know what lasts. These bulls will work for you.

We guarantee it.

VOLUME DISCOUNTS

Purchases of 3 or more bulls qualify for a discount equal to the number of bulls bought, up to 10%. For example, buy 6 bulls and get a 6% discount.

DELIVERY

Free delivery nationwide. \$100 discount per bull if you haul your purchased bulls home sale day.

HEALTH

Each bull has been vaccinated with IBR, BVD, P13, Vibro Letpo 5, 7-way Blackleg, poured with Ivomec and received a magnet. All bulls have been fertility checked. Actual scrotal measurements bulls are listed in the catalog.

EXTENDED CARE

River Creek Farms will continue to develop bulls until April 1 at no additional charge. Please notify us if you would like this option.

RETAINED SEMEN INTEREST

River Creek Farms will retain 1/3 semen interest on all bulls in the offering, unless otherwise noted.

“The best part of River Creek bulls is the people behind them. They have a good guarantee and they stand behind their cattle completely. Great people to do business with. I’ve spent a lot of time on the phone with Joe, and he’s been helpful in identifying the bulls that have been a real asset to my program.”

2025 BIF Seedstock Producer of the Year, River Creek Farms, uses cutting-edge genetic and reproductive technologies to improve predictability, reduce risk and accelerate genetic progress within their Simmental-based herd.

BY ANGIE STUMP DENTON

Originally published by Drovers Magazine
July 2025

Using technology and data-driven solutions to enhance herd performance, optimize feed efficiency and scale marketing efforts is a key strategy for the Mertz family of River Creek Farms.

A seedstock cattle operation located in the heart of the Kansas Flint Hills, River Creek Farms was established in 1890. The farm has deep agricultural roots spanning multiple generations and a reputation for producing high-quality SimAngus genetics built to work in real-world conditions.

The Beef Improvement Federation (BIF) presented River Creek Farms the 2025 BIF Seedstock Producer of the Year Award on June 12 during the group's annual research symposium in Amarillo, Texas. This national award is presented annually to a producer whose dedication to improving the beef industry at the commercial level deserves recognition.

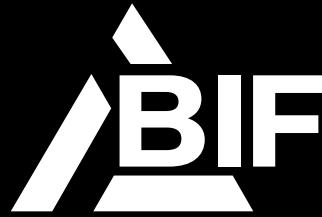

The River Creek Farms registered cow herd was founded in 1970 by Joe Mertz, using some of the first Simmental genetics imported into the U.S. Soon after, River Creek Farms became an early member of the American Simmental Association (ASA). Today, the operation is managed by Joe and his son, Abram.

The current cow herd consists of 800 cow-calf pairs, including 500 registered Simmental and SimAngus cows and 300 commercial recipients dedicated to the embryo transfer (ET) program.

"At River Creek Farms, our production philosophy is grounded in one simple principle — every bull we sell should deliver a measurable return on investment for our buyers," Joe says. "This isn't just a goal — it's a promise backed by decades of experience, rigorous data and a commitment to excellence in cattle breeding."

All bulls sell with a four breeding season guarantee on feet and semen. If a bull's semen or feet go bad, they will provide credit for the breeding seasons left to complete.

1975

2025 SEEDSTOCK
PRODUCER OF THE YEAR

The River Creek Farms registered Simmental cow herd was founded in 1970 by Joe Mertz, using the first Simmental genetics imported into the U.S.

River Creek Farms customer Dan Rosebrook, from Lincoln, Kan., has been buying bulls from the Mertz family for 10 years. He shares, "They have really good bulls, but what I really appreciate is they are really good people to deal with and stand behind their bulls."

River Creek Farm uses genomic-enhanced selection to accelerate genetic progress and improve herd predictability. Their entire cow herd is DNA-tested, with genomic-enhanced EPDs and confirmed parentage, allowing them to make data-driven breeding decisions and rapidly multiply superior genetics.

"By leveraging genomics, we can accurately predict traits such as growth, feed efficiency, carcass merit and maternal performance, ensuring our cattle meet the highest industry standards," Joe explains. Prior to calving, every cow is enrolled in the Total Herd Enrollment (THE) program through ASA, allowing comprehensive record-keeping and genetic benchmarking. At birth, all calves are DNA-sampled using tissue collectors, with samples immediately sent to ASA's Calf Crop Genomics program. This process provides genomic-enhanced EPDs and parent verification, delivering early and accurate performance data that refines selection decisions and optimizes future matings.

"By integrating advanced genetic tools and comprehensive performance tracking, we enhance predictability, efficiency and genetic progress, ensuring our customers receive cattle built to perform in real-world conditions," Abram says.

Advanced reproductive technologies, including embryo transfer, play a critical role in accelerating genetic progress, with hundreds of embryos transferred annually.

"A strong desire for progress drives the Mertzes to raise the bar on quality year after year," says Matt Teagarden, Kansas Livestock Association chief executive officer. "Following their annual bull sale, the family closely analyzes every data point from each lot to determine which traits their customers place the highest value on. As customer priorities shift over time, River Creek Farms adapts its program to meet demand. Their tremendous record keeping and organizational skills have been paramount to maintain the volume of data they've compiled over the years." ■

LONGEVITY

A critical factor in a bull's ROI. At River Creek Farms, we breed, develop, and handle our bulls to maximize their productive lifespan, ensuring that every bull not only performs but performs for years to come.

BUILT TO WORK

At River Creek Farms, our breeding philosophy is grounded in one simple principle: every bull we sell should deliver a measurable return on investment for our buyers. This isn't just a goal—it's a promise backed by decades of experience, data, and a commitment to excellent service.

Longevity is a critical factor in a bull's ROI. At River Creek Farms, we breed, develop, and handle our bulls to maximize their productive lifespan, ensuring that every bull not only performs but performs for years to come.

BULL DEVELOPMENT

Our approach begins during the post-weaning growth phase, where bulls are raised on grass with limited resources. This targeted development encourages slow, steady skeletal growth, producing bulls with strong feet and sound structures. By focusing on building skeletal strength and athleticism early, we create bulls that can responsibly add muscle and pounds during testing and thrive under demanding conditions for the long haul.

HYBRID VIGOR

At River Creek Farms, we harness the power of hybrid vigor to create bulls that blend the maternal strength and structural soundness of Simmental genetics with the carcass quality and efficiency of Angus. Crossbreeding reduces the incidence of common challenges like hoof and fertility issues while increasing a bull's productive lifespan. The result? Bulls that deliver higher ROI by lasting longer and performing better across a range of conditions.

CALVING EASE

At River Creek Farms, our bulls are selected to sire calves that come easily, get up quickly, and go to work early, reducing labor, stress, and risk at calving time. Our cows calve unassisted on native grass, validating calving ease in real time. We have prioritized calving ease without sacrificing growth for more than 50 years. By combining proven Simmental and Angus genetics, the result is fewer problems at birth and more live, thriving calves on the ground, year after year.

DISPOSITION

A bull's disposition directly impacts both safety and productivity. We practice a low-stress handling system throughout our operation. From an early age, our bulls are exposed to human interaction in controlled environments, fostering familiarity and reducing flight responses. The result is bulls that our customers say are calm, cooperative, and accustomed to working in close quarters.

MATING FLEXIBILITY

At River Creek Farms, you have options when it comes to the level of Simmental influence in your cow herd. Whether your goal is predominantly Angus-influenced calves, 50/50 SimAngus, or purebred Simmental, our bulls are built to fit your program. We offer a large selection ranging from 1/4 and 3/8 Simmental bulls to purebred Simmental and Angus options, with the majority of our offering centered around practical, proven 1/2-blood SimAngus bulls.

4-YEAR GUARANTEE ON FEET, SEMEN & DISPOSITION

We're committed to making sure your investment in River Creek genetics produces a positive economic return.

We believe that trust and transparency are the pillars of any successful business relationship. While we do everything in our control to develop young herd sires that are built to work - it's possible a bull may still fail to breed cows for a variety of reasons post sale. If this happens, we want to be as transparent as possible in how we will handle the situation.

We guarantee every bull sold will work for four years. Should a problem arise, credit will be issued equal to the bull's Net Breeding Value minus the salvage price you receive locally. ■

4. Spring/Fall 2029	\$0	\$0	\$0

Season(s) complete: the last breeding season the bull successfully bred cows. Buyer keep 100% of the salvage price at all times.

TOP DOLLAR ANGUS THE MARK OF CARCASS QUALITY

Top Dollar Angus is the first and only certification program for commercial feeder cattle focused exclusively on Angus and Red Angus-based cattle with top 25% growth and carcass traits. River Creek Farms relationship with Top Dollar Angus rewards our buyers who focus on producing profitable cattle. Top Dollar works with cattle buyers and feedlots looking to purchase and feed high-value feeder calves.

We are offering 140 Top Dollar Angus qualified SimAngus and Angus bulls. Each bull represents an exclusive opportunity to purchase SimGenetics that possess the Marbling genetics to qualify for premium Angus-based feeder programs, while taking advantage of natural growth benefits associated with hybrid vigor. ▀

"As I travel and meet with our Top Dollar Angus Feeding partners, feedlot managers consistently say that, for success, they need cattle they KNOW can stay healthy, grow quickly, efficiently, and achieve the carcass traits to reach a high-quality grade.

River Creek Farms has focused on these same traits with hybrid genetics for use on Angus and Red Angus-based females and built them to meet the industry demand."

NATE SMITH
General Manager
Top Dollar Angus

COMMITTED TO CALVING EASE

River Creek cows are expected to calve unassisted, re-breed on grass without grain and wean a calf. Cows that fail to meet our strict standards are culled from the herd. Bulls in the catalog are ranked based on their genotype, using the star rating system to the right. ▀

Use on any British or Continental heifer, and young or mature cows.

Use on bigger framed heifers, young cows, and mature cows.

Use on young or mature cows.

Use on mature cows only.

HOW TO BID

Bid with confidence knowing we stand behind every bull.

DVAuction
Broadcasting Real-Time Auctions

Scan the QR code and register to bid online at DVauction.com

SIGHT UNSEEN GUARANTEE

We want you to feel comfortable bidding on the bulls if you can not make it sale day. If you're concerned about buying a bull sight unseen, please remember that if you're not satisfied with the bull, we will return your money.

1

BID ON DVAUCTION

The sale will be broadcast live on DVauction. Please register in advance to avoid any issues. We have broadcast the sale on the internet for the last decade and never experienced any issues. We recommend this method.

2

BID ON THE PHONE

You are welcome to bid over the phone. Please call Joe Mertz at 785-458-9494 prior to the sale to indicate what lots you are interested in bidding on. On sale day, a member of our team will be in touch to field your bids.

3

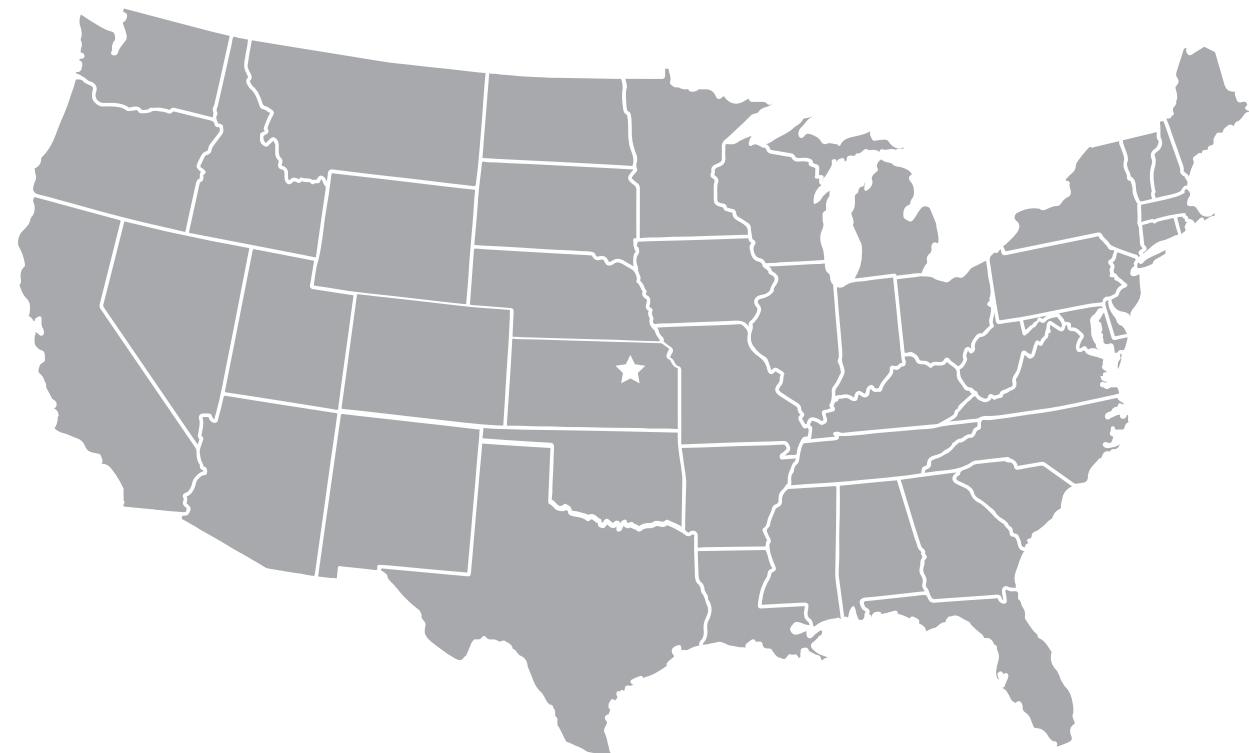

PLACE AN ORDER

Call Joe at 785-458-9494 anytime in advance of the sale to discuss the bulls and place an order. Long time customers trust us to purchase bulls for them. We will treat your herd like our own.

WE DELIVER

Free nationwide delivery for every bull.

■ FREE BULL DELIVERY NATIONWIDE

River Creek Farms offers free delivery anywhere in the lower 48 states. We work alongside trusted livestock transporters to ensure professional, careful handling of your cattle. We'll collaborate with you to arrange delivery, with most cattle delivered within 45 days of the sale.

If expedited delivery is needed, let us know immediately, and we'll make arrangements. In some cases, buyers may need to meet the truck at a central location, such as a livestock auction or veterinary clinic, nearby. ■

HAUL HOME DISCOUNT

\$100 discount per bull if you haul your purchased bulls home sale day.

BRED HEIFER DELIVERY

Nationwide delivery available. We will work with buyers to arrange the most economical delivery possible.

HERD Sires

Put River Creek Genetics to Work in Your Herd.

2025 marked a breakout year for the River Creek Genetics division. Demand for our semen more than tripled year over year, with genetics shipped to breeders in 30 states. That growth wasn't driven by hype or volume. It was earned by the bulls in our line-up, checking boxes and producing cattle the work. To everyone who has purchased semen from River Creek, thank you. Your trust and support matter.

The year also brought major milestones for the program. River Creek Genetics signed an exclusive marketing agreement with AgriGene Australia, positioning our Simmental seedstock genetics in an international marketplace and reinforcing the global relevance of this program. With CSS-qualified semen readily stocked on several of our herd sires, we are actively pursuing additional international partners to expand the reach of River Creek Simmental and SimAngus genetics worldwide.

Momentum continues to build as we move into 2026. With expanding demand, new partnerships, and a growing pipeline of elite sires, River Creek Genetics remains focused on one thing, delivering genetics that drive measurable progress for both seedstock and commercial producers.

Just as important, River Creek Genetics remains fully independent. We are not owned by a stud, a semen company, or a corporate entity. That independence matters. It allows us to be selective, honest, and disciplined in what we choose to promote and what we release.

HOW TO ORDER

*Order online at RiverCreekFarms.com
or, call 785-292-0720 for assistance.*

FREE SHIPPING

River Creek covers all shipping costs. No freight quotes, no surprises. Buy the semen you want, from who you want, and we will take care of delivery.

HEIFER PROJECTS

For large-scale heifer projects, River Creek can provide volume semen pricing along with marketing assistance. Contact us to visit about your available options.

											1	1

- On January 6th, MONACO cemented himself as a rising star in the breed. 25 units of semen were sold at public auction, commanding an unprecedented \$3,080 average per unit. Selling to top Simmental breeders across the country.
- Our \$200,000 high-selling selection from the 2025 Keller Broken Heart Ranch sale, no other bull in our lineup has generated more phone calls or inquiries about semen availability. And for good reason. If you have seen him in person, you know MONACO is a true phenotypic standout, offering even more performance than his sire, all packaged in a 3/4 Simmental pedigree.
- If you are looking to make bulls that are relevant to both commercial bull buyers and purebred breeders, there is no better place to start than MONACO. He brings more growth and more marbling than virtually any bull in the breed today. Use him to produce high-selling bulls and elite replacement females that work in real-world programs.
- As a courtesy to the breeders who invested in the initial offering of MONACO semen, we will not be selling anymore until Fall 2026.

%	10	10	2	1	3	5	1	30	25	1	2	1

The most complete heifer bull prospect of 2025, sired by the semen-limited Money Maker.

- Behind MONACO, no bull in the lineup is generating more momentum than NEW HEIGHTS. That interest culminated in the January 6 auctions, where 3-unit packages averaged \$450 per straw.
- In the wake of recent changes to Calving Ease formulas, it is difficult to comprehend a bull with this kind of EPD profile. Yet NEW HEIGHTS has surged to the top. He stands alone as the most unique blaze-faced heifer bull in the business, blending a truly jaw-dropping, one-of-a-kind Birth Weight to Yearling Weight spread with elite, standout phenotype.
- According to the International Genetic Solutions database, no other bull combines a negative Birth Weight of -3.4 or lower with this level of Yearling Weight. He is square-footed, stout from the ground up, and wide-based with added power, while remaining smooth-shouldered and long-sided.

NEW HEIGHTS semen will be offered in limited quantities through public auction. The next sale will be held in early March. Follow River Creek Farms on Facebook or visit rivercreekfarms.com for updates.

%	40		4	4	20		15	15	1	1	1	1

- MAINSTAY brings the power, the numbers, and the look—all wrapped in a bold blaze face. This bull is huge boned, athletic, and maturing into an absolute stud. He will transmit size, power, and length of body to both his sons and daughters. He's exactly what today's discerning bull buyers are after and has all the tools to help build the next generation of impactful SimAngus cattle.
- Demand for Mainstay semen has been immediate and decisive. We were reluctant to offer him publicly, knowing early on this bull was developing into a true stud, but once released the response left no doubt. Semen first sold this fall through our Fall Sale and with Gibbs in Alabama, averaging over \$100 per unit, and interest has only intensified as more breeders have seen him in person. That momentum carried straight into January 6, when Mainstay semen averaged \$350 per unit in our online Monaco semen auction, firmly establishing his place among the most sought-after genetics we offer.

MAINSTAY semen will be offered in limited quantities through public auction. The next sale will be held in early March. Follow River Creek Farms on Facebook or visit rivercreekfarms.com for updates.

%	10	10	2	4	10		15		45	15	15	4

- Featured as Lot 69 in the 2025 Werning Sale and sired by TSN Statesman K006, one of the most sought-after bulls in the business whose limited semen inventory is commanding over \$400 per unit, HEADSHOT emerges as the blaze-faced heir to the throne. He brings even more style and performance to the table.
- HEADSHOT pairs elite phenotype with calving ease and performance at a level rarely seen. The IGS database shows only 10 purebred Simmental bulls in America match his combination of Calving Ease, Birth Weight, Weaning Weight, and Yearling Weight.
- There was a multi-day stretch recently at River Creek where HEADSHOT and MONACO stood in pens next to each other, and the comparison was impossible to ignore. Phenotypically, there are far more similarities than differences. The same power, the same frame, and the same kind of presence that draws attention at first glance.

The \$69,000 high selling Statesman son from the 2025 Werning Cattle Co. Bull Sale.

HEADSHOT semen will be offered in limited quantities through public auction. The next sale will be held in early March. Follow River Creek Farms on Facebook or visit rivercreekfarms.com for updates.

OF BULLS IN THE TOP 25% OF THE BREED

THE AVERAGE RANKING OF ALL BULLS IN THIS SALE IS IN THE TOP 30% OF THE BREED FOR THE FOLLOWING TRAITS:

CE • BW • WW • YW • MCE • MWW
DOC • CW • MRB • \$API • \$TI

RVR MCLAREN 509M

1

- RVR MCLAREN 509M is a man among boys. This Homelander son is impeccable in his makeup and demands attention from every angle. He is large framed, skeletally extended, huge hipped, and big bodied, yet remains remarkably correct in his structure.
- His reach and extension up front are elite, paired with a long, fluid stride from behind that speaks to both athleticism and longevity. He sets down on a near-perfect angle to his pasterns and hock, blending power and balance in a way that is rarely assembled in one individual.
- The pedigree behind 509M is every bit as dominant as his phenotype. He traces to a lineup of sires renowned for generating elite females, beginning with RC Xceed 063D, the high-selling bull from our 2019 sale that went to Triangle J Ranch and Gibbs Farms. That foundation is further strengthened by the influence of MCM Top Grade 018X, S A V Final Answer 0035, and HTP SVF In Dew Time. All of this is anchored by the incomparable Miss RC 600U 501F. Proven Simmental breeders will recognize her as the dam of former River Creek high seller RC Stinger, purchased by TNT Simmentals of ND, and the maternal granddam of breed legend RC Club King 040R, purchased by Hart Simmentals of SD. His excellence is the direct result of intentional, time-tested breeding.
- On paper, MCLAREN is equally compelling. Only 4 SimAngus bulls in the IGS database combine a -2 BW EPD, 97+ WW and 1.14 or greater Marbling EPD. All while ranking in the top quartile of the breed for CE, MCE, Milk, Stayability, and Docility. This is a rare individual that unites eye appeal, proven maternal strength, and elite performance into one complete and uncompromising package.

KBHR HOMELANDER J071

Sire to Lots 1-30

Semen available at RiverCreekFarms.com

2

- RVR HOMELANDER 511M is built on a foundation of proven herd sire power from the heart of the River Creek Farms program, combining the influential genetics of KBHR Homelander J071, Schooley Haggard A411H, and MCM Top Grade 018X. This is a pedigree rooted in performance, consistency, and real-world profitability, designed to deliver value across multiple production environments.
- Numerically, 511M backs his look with an elite statistical profile. He ranks in the top 1% of the breed for API and TI, top 2% for Marb, top 4% for Stayability, top 15% for BW and ADG, top 20% for YW and CW, and top 25% for WW and MWW. These figures reflect a balanced genetic package that supports calving ease, growth, maternal strength, and carcass merit.
- Phenotypically, 511M is big framed, stout, and big bodied with the kind of mass, depth, and structural correctness that commercial and seedstock breeders demand. He is a true breeder bull that does everything right, combining eye appeal with functionality and longevity. With his balanced design and favorable calving ease profile, he can be confidently used on heifers while still adding performance and value to the next generation.

RVR HOMELANDER 513M

3

- RVR HOMELANDER 513M is a true heifer-plus Homelander bull that closely mirrors the genetic makeup and build of our lead-off Homelander son, RVR MCLAREN 509M. He offers the same proven formula on the bottom side, being out of an RC XCEED 063D daughter that traces directly back to S A V Final Answer 0035 and the legendary Miss RC 600U 501F cow. This maternal lineage is synonymous with calving ease, fertility, and long-term productivity, adding confidence and reliability to his genetic profile.
- Numerically, 513M separates himself with a rare and powerful combination, ranking in the top 1% of the breed for Marb, API, and TI. These figures speak to his ability to add carcass value while maintaining balanced maternal strength and economic relevance.
- From a phenotype standpoint, 513M is ultra complete. He is sound, well balanced, and correctly built with very few holes, making him easy to appreciate from every angle. This is a bull that blends calving ease, elite maternal backing, and high-end carcass merit into one cohesive package. Use him to build elite replacement females or produce top-end bull calves. The choice is yours, and the outcome is predictable.

RC XCEED 063D

Maternal Grandsire & 2019 High Selling Bull
Owned by Triangle J Ranch, NE & Gibbs Farms, AL

4

- RVR Homelander 507M sits at the intersection of SimAngus greats, combining Homelander with a Roseda Powerball23 F091 dam. Powerball23 sons have topped each of our past 2 sales, with 20 head averaging over \$19,000 at River Creek. Standout bulls from this lineage include RVR Haymaker, sold to Iron Creek and Drake in Iowa, RVR Tyson at Lonesome Pine Farms in Alabama, and RVR Jordan 23, jointly owned by Kearns Cattle in Nebraska, Crossroads Cattle in Tennessee, and Eichacker Simmentals in South Dakota. This cow family and sire combination represents the cutting edge of what is possible with SimAngus genetics.
- 507M delivers exceptional mass, depth, and volume in a smooth, attractive, and structurally correct package. He blends power with balance and offers the kind of presence that demands attention on foot.
- Numerically, he matches his physical dominance, ranking in the top 1% of the breed for Marb, API, and TI. To put his economic value into perspective, there are only 21 bulls in the country with a higher \$TI EPD. This is another Homelander son that truly does it all.

Paternal Granddam to Lot 4

5

- Heifer-ready without compromise. 570M is a true heifer bull prospect that delivers calving ease while still maintaining elite growth, carcass merit, and maternal value. You do not have to give up performance or long-term productivity to use him early. He simply does it all.
- RVR Homelander 570M is a truly unique individual and stands at the very top of this offering from a numerical standpoint. He is the highest API bull in the sale at 223.7 API, paired with an elite 1.49 Marb EPD. He current ranks as the #7 MARB EPD among all SimAngus bulls in the IGS database, placing him in extremely rare company for overall economic value and carcass merit.
- Maternally, 570M is built for long-term success. His dam is sired by Schooley Haggard A411H, with Tehama Tahoe B767 stacked behind her and tracing back to the legendary RC Club King 040R. This maternal lineage adds predictability and fertility, reinforcing his value well beyond the first calf crop.

- RVR Homelander 561M is backed by a proven maternal pedigree, stemming from a W/C Rapid Fire 2101C dam. The Rapid Fire females are elite in their look and consistently pass on added presence.
- Built for the Angus-influenced commercial operation, this SimAngus bull is built to drive weaning performance in a single generation. Very few bulls in America combine this level of Weaning Weight, Yearling Weight, and Marbling in one predictable package.
- The numbers are not theoretical. They are backed by performance under pressure, ranking 2 of 93 at weaning and 4 of 53 at yearling. This is measurable, repeatable progress for commercial herds that demand results.

- RVR FIREPROOF 535M is an exciting bull leading off our first set of GAR Fireproof sons. We sampled Fireproof with the intent of pushing the upper limits of carcass value without sacrificing real-world usability, and this sire group delivers exactly that. These bulls need to be seen in person. They represent the epitome of practical beef bulls built with added value where it pays.n.
- Phenotypically, 535M is long bodied, big framed, and powerful with the mass and structure demanded by progressive commercial and seedstock programs. This is a Fireproof son that brings balance, performance, and profitability together in one elite package.

G A R FIREPROOF
Sire of Lots 31-36

- RVR POWERBALL 436M is backed by an exciting and outcross maternal package, being out of the CLRS Keepsake 251K donor from English Oaks Ranch. She was a high-selling open heifer from Clear Springs Cattle Co. and is a beautifully made cow that brings both quality and genetic diversity to the program. Her sire, CLRS Homeland 327H, is widely recognized for producing elite phenotypic females with longevity, balance, and maternal strength.
- 436M delivers an impressive multi-trait profile, ranking in the top 3% of the breed for CE, YW, \$GN, and Marb, top 10% for BW and MCE, and strong for WW, ADG, and CW. This balanced spread culminates in top 1% rankings for both API and TI. As an embryo bull calf, he represents a true multi-trait leader and introduces fresh maternal genetics for long-time and loyal customers looking to diversify without sacrificing performance.
- If you are a discerning breeder focused on building elite replacement females while maintaining growth, efficiency, and carcass value, this is the kind of bull that moves a cow herd forward in a single generation.

■ If you are a fan of deep-bodied, big-topped beef bulls, look no further. This Commerce sire group has blown the doors off the pen this year, delivering power, dimension, and real-world value in a consistent set.

■ We lead off with RVR COMMERCE 597M, a 1/2 SimAngus bull that truly exemplifies what is possible with this mating. He is a slam-dunk heifer bull, backed by proven maternal strength that traces to the influential MCM Top Grade cow family. Phenotypically, he is stout, attractive, and built with the kind of depth and balance that works in any environment. Commercial cattlemen can confidently use 597M to generate elite replacement females or produce a top-end set of steers that add pounds and value where it counts.

- RVR HAGGARD 521M is our lead-off son of Schooley Haggard and one that quickly commands attention. He is double bred Haggard, as his dam jumped the fence and was bred back to her own sire. After seeing how 521M turned out, we are more than glad she did. This mating stacked the deck with maternal power, giving him two shots of the legendary cows Schooley Miss 3000A 823F and TJ 22X.
- Numerically, 521M is as strong as they come. He ranks in the top 1% of the breed for API, top 2% for CE, Marb, and TI, top 5% for Docility, and top 10% for BW and Stayability. Making him a true breeding piece for progressive commercial programs.

- RVR TRUE GRIT 500M is the stoutest, thickest-made bull from end to end in the entire offering. He comes to our customers as a complete outcross, being out of one of the top females acquired from our purchase of the fall-bred heifer group from Ruby Cattle Co. This maternal base adds freshness and versatility while maintaining the kind of power and functionality demanded by commercial cattlemen.
- Sired by Basin True Grit 1021, 500M combines performance with the renowned maternal strength of the Linda cow family. He offers a practical and usable numeric profile, ranking in the top 25% for BW and top 10% for both WW and YW. Phenotypically, he is bold ribbed, wide based, and massively constructed with the kind of shape that stamps his progeny.
- We expect 500M to sire an extremely powerful set of bulls and heifers, and he should cross exceptionally well with high-marbling lines. This is a bull built to add muscle, dimension, and payweight while complementing programs focused on carcass quality and maternal longevity.

RVR QUADRANT 520M

74

- RVR QUADRANT 520M leads off the Ruby's Quadrant sire group and does so with authority. He is a 3/4 Simmental, 1/4 Angus son of the great Ruby's Quadrant 210K and closely mirrors his sire in terms of thickness, structural integrity, and center body. From end to end, 520M is bold ribbed, wide based, and impeccably put together with a huge middle and exceptional hoof shape. We expect him to sire beautifully constructed cattle while improving foot quality, durability, and structural soundness across a cow herd.
- This is a bull whose daughters should be retained with confidence, as they are built to become productive, sound, and profitable cows for the long haul. This pedigree blend offers both power and reliability, making 520M a true breeding piece.
- Numerically, 520M brings a strong and balanced profile. He ranks in the top 1% of the breed for MWW, top 2% for WW, top 4% for Docility, top 10% for YW and Milk, and top 25% for Stayability, CW, and TI.

RVR REVOLUTION 614M

89

- RVR Revolution 614M is a beautifully constructed 3/4 blood son of KBHR Revolution H071, supported by a powerful maternal pedigree that includes a SAV Rainfall 6846 daughter and an MCM Top Grade 018X granddam. This pedigree is purpose-built to generate elite females with longevity, functionality, and real-world earning power.
- He ranks among the very best Revolution sons we have produced to date. His balance, structure, and genetic profile align seamlessly with what progressive cow herds demand, the kind of daughters that improve consistency, add value, and elevate programs generation after generation.
- Revolution daughters continue to emerge as cornerstone females across the US, and their influence is both immediate and widespread. He may go down as the greatest cowmaking son of the influential C4 cow.
- Numerically, 614M reinforces that confidence. He ranks in the top 20% for BW, DMI, MCE, and API, while advancing into the top 15% for \$GN, Milk, and MWW. He further excels in the top 10% for Stayability and the top 25% for Marbling. The blend of maternal power, balanced performance, and proven cow strength positions this bull as a direct investment in the future of your female base.

RVR KODIAK 458M is a striking blaze-faced son of TERS Kodiak 206K, backed by our cornerstone Kansa cow family and a pedigree saturated with proven maternal legends. His maternal pedigree reads like a blueprint for functional, high-value females: KBHR Revolution H071, Hook's Beacon 56B, WS All-Around Z35, and MCM Top Grade 018X.

His maternal granddam is the dam of RVR Tyson 429K, the lead-off Powerball 23 son from an absolutely stacked sire group that also included RVR Haymaker and the high-selling bull of our 2024 sale. We have used Tyson heavily within our own operation and could not be more pleased with his first calf crop. Expect those progeny to headline our November production sale.

Semen available at RiverCreekFarms.com

RVR TYSON 429K

2024 High Selling Bull

Semen available at RiverCreekFarms.com

- RVR KODIAK 457M is the very best TERS Kodiak 206K son we have produced to date and stands among the most unique SimAngus bulls slated to sell this spring.
- Do not overlook the female power behind this bull. What truly separates 457M is the consistency and strength of the mating. His ET full sister is arguably the best phenotype fall heifer we have this year and is pictured below. Their dam, RVR Miss Powerball 414K, is a 1/8 SM cow with elite growth and carcass traits, offering tremendous mating flexibility and true outcross potential when used on purebred Angus bulls.
- Adding another layer of value and urgency, Kodiak suffered a permanent breeding injury, meaning his progeny will be extremely limited moving forward. Opportunities to access this genetic combination will be scarce.
- Ranks in the top 5% for CE and top 20% for BW, while still driving growth with top 10% WW and top 15% YW. He delivers true heifer-use potential without sacrificing pounds, maternal integrity, or long-term value.

Homozygous Black. Homozygous Polled.
Donor dam has averaged a 88 BWR.

- RVR Kodiak 439M is an extremely well-balanced, attractive-fronted bull that qualifies as a true slam-dunk heifer option. Use on commercial Angus cows to inject hybrid vigor into a majority-Angus program.
- His dam is a full sister to our 2024, \$40,000 high-selling bull, RVR Tyson 429K. RVR Miss Kansa 436K is an emerging star in our program and has already been flushed extensively. Most breeders who have made whole-herd visits consider her our best half-blood SimAngus female. She features a perfect udder, a feminine and refined design, and exceptional power. She represents the prototype for what a SimAngus female should look like.
- From a performance standpoint, 439M adds real substance. He ranks in the top 2% for BW, Stayability, and API, top 5% for CW, and top 10% for Marbling and TI. This is a program-changing bull that offers both calving ease and carcass value, while enhancing marketing opportunities on powerful, high-growth purebred females.

- RVR Head Start 546M is a striking blaze-faced bull that checks every box for a true purebred heifer bull.
- He leads off an exciting new sire group by SFG Head Start H0509, a sire lineup that should strongly resonate with commercial cattlemen seeking calving ease paired with look, balance, and maternal integrity, all with the added market appeal of a splash of white on the face.
- His dam is one of the first daughters of KBHR Homestead H016 to enter production. Homestead is a full sibling to KBHR Honor and continues to gain traction as his influence expands across the breed. 546M also traces back to a Thomas Angus cow, adding another proven layer of maternal reliability, udder quality, and long-term function.

- RVR HEAD START 580M is another baldy, purebred son of SFG Head Start H0509, out of an LBRS Genesis G69 daughter that traces back to the proven Whitestone Forever Lady Angus cow family.
- This bull represents the purebred version of our popular TJ North bull. Do not let the picture fool you. 580M is an eye-catching, moderate-framed, thick-made individual with genuine muscle, balance, and athleticism, and he offers legitimate heifer-use potential.
- The combination of calving ease, carcass merit, and maternal reliability positions him as a versatile option for programs focused on building replacement females or producing a high-demand, high-selling set of SimAngus calves.

PUREBRED ANGUS BULLS

18-MONTHS OLD

RVR VICTORY M404

*\$40,000 High Selling Angus Bull
in our 2025 Fall Production Sale
Sold to R&K Cattle, AL*

124

- An extremely exciting Angus prospect to lead off our Purebred Angus bull division, this standout is sired by the \$200,000 Angus breed leader 44 Victory.
- He is backed by one of the most powerful cow families in the breed. His maternal sister, EXAR Elba 9501, sold for \$650,000 in the 2023 Express Ranches Big Event, becoming the highest-selling cow in Angus breed history. In just the 2 short years since that sale, Elba 9501 has gone on to generate more than \$4 million in progeny sales, solidifying her position as a true cornerstone donor.
- This bull represents a rare and meaningful investment opportunity. The pedigree, momentum, and market credibility are already established, and the upside is undeniable. River Creek is excited about the future of this sire and would welcome the opportunity to actively help promote him alongside the new owner.
- A true opportunity to step into the very top tier of the Angus business.

BRED HEIFER PACKAGES

FALL CALVING

PACKAGES OF 3 REGISTERED BRED HEIFERS

LOCATION

Kingsley, IA

CALVING WINDOW

September 9 to October 9, 2026

SIRES

Schooley Haggard A411H

DESCRIPTION

An outstanding set of registered Angus bred heifers selling in carefully assembled groups. These females are AI bred and cleaned up by Schooley Haggard A411H, offering elite terminal value and replacement heifer opportunities. Calves will rank in the top 5% for API and TI. We'll preg-check and sort these heifers into groups of 3 prior to the sale. Check back after February 1 for videos on DVAAuction.com.

SIRES

Schooley Haggard A411H

DESCRIPTION

60 total. AI bred to Homelander & TJ North. All heifers were cleaned up with TJ North following AI. First AI service was November 10, with a second AI service on December 1. These heifers were purchased locally in 1 uniform group and have been managed together since acquisition. The set is 95% black with a few BWF females mixed in. Fetal sexing will be completed on both AI groups during the first week of February. We will sort these heifers into packages of 5 based on the results.
