

RIVER CREEK

2026 FALL PRODUCTION & GENETICS SALE
NOVEMBER 3 & 4, 2026 // MANHATTAN, KS

BUILT
to WORK

RVR CRK

SHAPING THE FUTURE.
ONE GENERATION AT A TIME.

Progress takes conviction, the willingness to make your own breeding decisions, put cattle to work, and let the results shape what comes next. For more than 50 years, that has been our approach at River Creek Farms.

Today, we're breeding a new generation of SimGenetics with a clear purpose: deliver the most value to the commercial cattleman. Elite calving ease, disposition, fertility, growth, and carcass quality come together in sound cattle that perform through years of service. The result is a bull built to serve your herd today and leave it stronger tomorrow.

These bulls are built to work. We guarantee it.

VOLUME DISCOUNTS

Purchases of 3 or more bulls qualify for a discount equal to the number of bulls bought, up to 10%. For example, buy 6 bulls and get a 6% discount.

DELIVERY

Free delivery nationwide. $100 discount per bull or reg. heifer if you haul your purchased animals home sale day. Discount not applicable to commercial lots.

HEALTH

Each bull has been vaccinated with IBR, BVD, P13, Vibro Letpo 5, 7-way Blackleg, poured with Ivomec and received a magnet. All bulls have been fertility checked. Scrotal measurements bulls are listed in the catalog.

EXTENDED CARE

Bulls will be scheduled for delivery as soon as possible following the sale. Please let us know on sale day if you would like us to hold your bulls.

RETAINED SEMEN INTEREST

River Creek Farms will retain 1/3 semen interest on all bulls in the offering, unless otherwise noted.

★ ★ ★ ★ ★

"The best part of River Creek bulls is the people behind them. They have a good guarantee and they stand behind their cattle completely. Great people to do business with. I've spent a lot of time on the phone with Joe, and he's been helpful in identifying the bulls that have been a real asset to my program."

RON BROWN, WRAY, CO

2025 BIF Seedstock Producer of the Year, River Creek Farms, uses cutting-edge genetic and reproductive technologies to improve predictability, reduce risk and accelerate genetic progress within their Simmental-based herd.

BY ANGIE STUMP DENTON

ORIGINALLY PUBLISHED BY DROVERS MAGAZINE JULY 2025

Using technology and data-driven solutions to enhance herd performance, optimize feed efficiency and scale marketing efforts is a key strategy for the Mertz family of River Creek Farms.

A seedstock cattle operation located in the heart of the Kansas Flint Hills, River Creek Farms was established in 1890. The farm has deep agricultural roots spanning multiple generations and a reputation for producing high-quality SimAngus genetics built to work in real-world conditions.

The Beef Improvement Federation (BIF) presented River Creek Farms the 2025 BIF Seedstock Producer of the Year Award on June 12 during the group's annual research symposium in Amarillo, Texas. This national award is presented annually to a producer whose dedication to improving the beef industry at the commercial level deserves recognition.
The River Creek Farms registered cow herd was founded in 1970 by Joe Mertz, using some of the first Simmental genetics imported into the U.S. Soon after, River Creek Farms became an early member of the American Simmental Association (ASA). Today, the operation is managed by Joe and his son, Abram.

The current cow herd consists of 800 cow-calf pairs, including 500 registered Simmental and SimAngus cows and 300 commercial recipients dedicated to the embryo transfer (ET) program.

"At River Creek Farms, our production philosophy is grounded in one simple principle —every bull we sell should deliver a measurable return on investment for our buyers," Joe says. "This isn't just a goal — it's a promise backed by decades of experience, rigorous data and a commitment to excellence in cattle breeding."
All bulls sell with a four breeding season guarantee on feet and semen. If a bull's semen or feet go bad, they will provide credit for the breeding seasons left to complete.

River Creek Farms customer Dan Rosebrook, from

2025 SEEDSTOCK
PRODUCER OF THE YEAR

The River Creek Farms registered Simmental cow herd was founded in 1970 by Joe Mertz, using the first Simmental genetics imported into the U.S.

Lincoln, Kan., has been buying bulls from the Mertz family for 10 years. He shares, “They have really good bulls, but what I really appreciate is they are really good people to deal with and stand behind their bulls.”

River Creek Farm uses genomic-enhanced selection to accelerate genetic progress and improve herd predictability. Their entire cow herd is DNA-tested, with genomic-enhanced EPDs and confirmed parentage, allowing them to make data-driven breeding decisions and rapidly multiply superior genetics.

“By leveraging genomics, we can accurately predict traits such as growth, feed efficiency, carcass merit and maternal performance, ensuring our cattle meet the highest industry standards,” Joe explains. Prior to calving, every cow is enrolled in the Total Herd Enrollment (THE) program through ASA, allowing comprehensive record-keeping and genetic benchmarking. At birth, all calves are DNA-sampled using tissue collectors, with samples immediately sent to ASA’s Calf Crop Genomics program. This process provides genomic-enhanced EPDs and parent verification, delivering early and accurate performance data that refines selection decisions and optimizes future matings.

“By integrating advanced genetic tools and comprehensive performance tracking, we enhance predictability, efficiency and genetic progress, ensuring our customers receive cattle built to perform in real-world conditions,” Abram says.

Advanced reproductive technologies, including embryo transfer, play a critical role in accelerating genetic progress, with hundreds of embryos transferred annually.

“A strong desire for progress drives the Mertzes to raise the bar on quality year after year,” says Matt Teagarden, Kansas Livestock Association chief executive officer. “Following their annual bull sale, the family closely analyzes every data point from each lot to determine which traits their customers place the highest value on. As customer priorities shift over time, River Creek Farms adapts its program to meet demand. Their tremendous record keeping and organizational skills have been paramount to maintain the volume of data they’ve compiled over the years.” ■

DISPOSITION

At River Creek Farms, we select for disposition and reinforce it through consistent handling, developing bulls that are easy to manage and built for years of productive service.

BUILT TO WORK

At River Creek Farms, our breeding philosophy is grounded in one simple principle: every bull we sell should deliver a measurable return on investment for our buyers. This isn't just a goal. It's a promise backed by decades of experience, data, and a commitment to excellent service.

LONGEVITY

Longevity is a critical factor in a bull's ROI. At River Creek Farms, we breed, develop, and handle our bulls to maximize their productive lifespan, ensuring that every bull not only performs but performs for years to come.

Our approach begins during the post-weaning growth phase, where bulls are raised on grass with limited resources. This targeted development encourages slow, steady skeletal growth, producing bulls with strong feet and sound structures. By focusing on building skeletal strength and athleticism early, we create bulls that can responsibly add muscle and pounds during testing and thrive under demanding conditions for the long haul.

HYBRID VIGOR

USDA research found that crossbred cows raising crossbred calves weaned 23% more pounds of calf per cow exposed annually, reflecting improved reproduction, maternal ability, calf survival, and growth. Research also documented greater cow longevity. Those advantages compound over a cow's lifetime, creating more opportunities to wean a valuable calf and spread replacement costs across more years of production. That makes hybrid vigor especially valuable in the females you keep. At River Creek Farms, our SimAngus genetics combine the complementary strengths of Angus and Simmental to help you build a more productive cowherd, with replacement females that deliver value for years to come.

CALVING EASE

At River Creek Farms, our bulls are selected to sire calves that come easily, get up quickly, and go to work early, reducing labor, stress, and risk at calving time. Our cows calve unassisted on native grass, validating calving ease in real time. We have prioritized calving ease without sacrificing growth for more than 50 years. By combining proven Simmental and Angus genetics, the result is fewer problems at birth and more live, thriving calves on the ground, year after year.

DISPOSITION

A bull's disposition directly affects safety and productivity. We select for good disposition and practice low-stress handling throughout our operation. From an early age, our bulls receive regular human interaction and experience working in close quarters. They've been handled on foot and horseback, and they come to cubes. Our customers consistently describe them as calm and easy to handle, ready to settle into your operation.

MATING FLEXIBILITY

Our goal is to sell bulls that make crossbreeding easy, with options to match the level of Simmental influence you want in your herd. Whether you're targeting predominantly Angus-influenced calves, 50/50 SimAngus, or purebred Simmental, you can find bulls that fit your program. Our offering ranges from Angus to purebred Simmental, including a large selection of 1/4- and 3/8-blood bulls, with the majority centered on practical, proven 1/2-blood SimAngus genetics. ■

4-YEAR GUARANTEE

ON FEET, SEMEN & DISPOSITION

We're committed to making sure your investment in River Creek genetics produces a positive economic return.

We believe that trust and transparency are the pillars of any successful business relationship. While we do everything in our control to develop young herd sires that are built to work - it's possible a bull may still fail to breed cows for a variety of reasons post sale. If this happens, we want to be as transparent as possible in how we will handle the situation.

We guarantee every bull sold will work for four years. Should a problem arise, credit will be issued equal to the bull's Net Breeding Value minus the salvage price you receive locally. ■

Season(s) complete: the last breeding season the bull successfully bred cows.
Buyer keep 100% of the salvage price at all times

TOP DOLLAR ANGUS
THE MARK OF CARCASS QUALITY

Top Dollar Angus is the first and only certification program for commercial feeder cattle focused exclusively on Angus and Red Angus-based cattle with top 25% growth and carcass traits. River Creek Farms relationship with Top Dollar Angus rewards our buyers who focus on producing profitable cattle. Top Dollar works with cattle buyers and feedlots looking to purchase and feed high-value feeder calves.

We are offering Top Dollar Angus qualified SimAngus and Angus bulls. Each bull represents an exclusive opportunity to purchase SimGenetics that possess the Marbling genetics to qualify for premium Angus-based feeder programs, while taking advantage of natural growth benefits associated with hybrid vigor. ■

"As I travel and meet with our Top Dollar Angus Feeding partners, feedlot managers consistently say that, for success, they need cattle they know can stay healthy, grow quickly, efficiently, and achieve the carcass traits to reach a high-quality grade.

River Creek Farms has focused on these same traits with hybrid genetics for use on Angus and Red Angus-based females and built them to meet the industry demand."

NATE SMITH
General Manager
Top Dollar Angus

CALVING EASE SCORES

River Creek cows are expected to calve unassisted, re-breed on grass without grain and wean a calf. Cows that fail to meet our strict standards are culled from the herd. Bulls in the catalog are ranked based on their genotype, using the star rating system to the right. ■

★★★★
Use on any British or Continental heifer, and young or mature cows.

★★★☆
Use on bigger framed heifers, young cows, and mature cows.

★★☆☆
Use on young or mature cows.

★☆☆☆
Use on mature cows only.

HOW TO BID

BID WITH CONFIDENCE KNOWING WE STAND BEHIND EVERY BULL.

SIGHT UNSEEN GUARANTEE

We want you to feel comfortable bidding on the bulls if you can not make it sale day. If you're concerned about buying a bull sight unseen, please remember that if you're not satisfied with the bull, we will return your money.

1

BID ON DVAUCTION

The sale will be broadcast live on DVAuction. Please register in advance to avoid any issues. We have broadcast the sale on the internet for the last decade and never experienced any issues. We recommend this method.

2

BID ON THE PHONE

You are welcome to bid over the phone. Please call Joe Mertz at 785-458-9494 prior to the sale to indicate what lots you are interested in bidding on. On sale day, a member of our team will be in touch to field your bids.

3

PLACE AN ORDER

Call Joe at 785-458-9494 anytime in advance of the sale to discuss the bulls and place an order. Long time customers trust us to purchase bulls for them. We will treat your herd like our own.

LOT 44 RVR NORTH 156N

FREE DELIVERY

Free nationwide delivery for every bull
and bred heifer purchase.

FREE DELIVERY NATIONWIDE

River Creek Farms offers free bull and bred heifer delivery anywhere in the lower 48 states, regardless of purchase size. Our goal is to personally deliver as many cattle as possible. We also work with trusted livestock transporters to ensure professional, careful handling. In some cases, buyers may need to meet the truck at a nearby central location, such as a livestock auction or veterinary clinic.

Deliveries will begin as soon as the sale concludes. Once payment is received, we'll coordinate with you to arrange delivery. If you would like us to hold your bulls, please let us know on sale day. If you need delivery by a specific date, please notify our team as early as possible so we can plan accordingly. ■

- Each year, a KBHR HOMELANDER J071 son rises to the top. This year, RVR OVERTAKE 415N is that bull. As a 3/8 SM 5/8 AN, he offers a straightforward answer for customers with 5/8 SM 3/8 AN cows: bring the next generation back to 1/2 SimAngus while adding back the marbling and performance Homelander is known for.
- 415N ranks in the top 20% for CE; top 10% for WW, ADG, MCE, MWW, STAY and MW; top 5% for YW; top 2% for CW; and top 1% for MARB, API and TI. We believe his index rankings could get even stronger with the upcoming API and TI release.
- 415 has well-shaped hooves, clean joints and a balanced, exceptionally sound build. You'll find him in the heavy weight pen just as quickly as you find him on paper.
- 415N is a bull we want to use in our own herd and market through our semen company. With Homelander, Monaco and Landman already in our genetic lineup, that speaks volumes about how highly we regard him.

- RVR HOMELANDER 108N stacks proven sires and exceptional cows in a pedigree that brings together some of our best Simmental and Angus genetics. SCHOOLEY HAGGARD A411H, MCM TOP GRADE 018X and HTP SVF IN DEW TIME complement a maternal lineup that includes CHAIR ROCK SURE FIRE 6095, who recently sold for $55,000 in the Express Ranch dispersal, WS MISS SUGAR C4, BAR CK MS X38 106Z, TJ 22X, SCHOOLEY MISS 3000A 823F, HTP SVF HONEYDEW and RC Miss 600U 501F.
- 108N combines growth, maternal strength, disposition and elite carcass merit in one package. With Homelander deceased and his semen in short supply, opportunities to acquire sons with this depth of pedigree and genetic merit will become increasingly limited.

- RVR KODIAK N599 comes to you as a proven commodity, backed by one of the most prolific cows in the business. His dam, SCHOOLEY MISS 3000A 823F, has 127 progeny recorded with ASA and is the dam of Schooley Haggard A411H, Schooley Krown 28K, Schooley Knight 739K and Haggard's full sister, Schooley Miss 823F 068H. That sister is featured as Lot 2 in Schooley's 2026 fall female sale and produced their high-selling Kodiak sons this past year, making N599 a three-quarter brother to those bulls by blood.
- N599 handled light cleanup duty on open heifers at Hidden Pines Farm in Missouri. We know he sheds off, works on fescue and knows his job. He is long-made, fluid in his movement and carries plenty of pen presence. We've watched him throughout development, and he continues to get better with age.
- This 3/4 Simmental offers a proven cow family and an outcross opportunity for many longtime River Creek customers.

TERS KODIAK 206K / Sire

KBHR REVOLUTION H071 / Maternal Grandsire

- RVR KODIAK 406N is a fancy, upheaded blaze-faced heifer bull with a balanced look and generations of maternal strength behind him. Sired by TERS KODIAK 206K, he is out of a KBHR REVOLUTION H071 daughter who earned her place in the donor pen at an early age. She represents four consecutive generations of River Creek donors.
- This first-generation purebred ranks in the top 10% for CE, BW and API; top 15% for HP, STAY, CER and DOC; top 20% for MCE, Milk and MARB; top 25% for TI; and top 35% for DMI.
- His combination of calving ease, maternal merit and favorable intake genetics makes him an especially appealing option for producing replacement heifers.

S A V BLACKCAP MAY 416D
Maternal Granddam

W/C EL JEFE' 3044N
$295,000 3/4 Brother

- RVR STATESMAN 167N is the first natural calf out of our new donor, W/C BLACKCAP MAY 3104L. She was Dale Werning's favorite bred heifer in their 2025 sale offering, and letting her go wasn't an easy decision for the family. She calved shortly after the sale, then spent time alongside 167N at the donor facility as we began building around this exceptional cow family.
- 3104L is an RFS HEAVY HITTER H45 daughter out of S A V BLACKCAP MAY 4136D, combining genetics responsible for standout cattle in both the Simmental and Angus breeds.
- Further proof of this mating's market appeal is W/C El Jefe' 3044N, a 3/4 brother to 167N who commanded $295,000 as the selection of Steve Ford of Texas in the 2026 Werning Cattle Company Production Sale. Both are sired by TSN STATESMAN K006, and El Jefe's dam is a maternal sister to 3104L. That proven maternal foundation gives 167N mating flexibility and brings a powerful cow family to our customers' herds.
- 167N backs his pedigree with tremendous hoof shape and size, fluid movement and an easy-fleshing build. He carries a huge rib cage and the maternal look we want in a bull whose daughters you'll want to retain for years. If you're looking to build a set of replacement females, he deserves a close look.

- If you're a fan of deep-bodied, big-topped beef bulls, look no further. This Commerce sire group has blown the doors off the pen this year, consistently delivering power, dimension and real-world value.
- Leading off is RVR COMMERCE 417N, a 3/8 SimAngus bull who shows what this mating can deliver. Stout and attractive, he combines impressive depth with a balanced look.
- For commercial cattlemen, 417N offers the versatility to sire replacement females worth keeping and a stout set of steers with added pounds and market appeal.

- RVR COMMERCE 411N sets the standard for the kind of SimAngus bulls we want to offer going forward. Extremely long from front to rear, he combines a balanced skeleton with reach and curvature up front, a flexible rear leg and a long, fluid stride. He is loose through his spine, with a neck that comes cleanly out of the top of his shoulder. From behind, he is wide-pinned and level from hooks to pins. From the side, he is deep through his heart and flank, with just the right amount of middle. Easy-fleshing and heavy-muscled, he puts it all together in an exceptionally proportional package.

- RVR JAMESON 408N is an elite 1/2 SimAngus bull leading off a Jameson sire group that has stood out since birth. Robust and muscular, he is built to add pounds at weaning. He is a paternal brother to RUBYS GENERATIONAL 514N, the $120,000 Select Sires bull.
- His maternal pedigree stacks GIBBS 7382E BROAD RANGE, MCM TOP GRADE 018X, GW LUCKY MAN 644N, HC HUMMER 12M, PVF-BF BF26 BLACK JOKER and BLACK IRISH KANSAS, bringing together generations of sires that helped shape our herd.
- 408N backs that pedigree with top 1% WW, YW, ADG, MW, CW and TI, along with top 3% MARB and API. He offers serious growth and carcass merit in a stout, powerful package.

- RVR JAMESON N529 brings the Angus genetics you know with the added benefit of Simmental influence. Use him on higher-percentage Continental cows to move toward 1/2 bloods, or on commercial Angus cows to add a dash of heterosis.
- His pedigree stacks BASIN JAMESON 1076, COLEMAN CHARLO 0256 and S A V ANGUS VALLEY 1867 over a proven Simmental maternal foundation. HTP SVF IN DEW TIME, HC HUMMER 12M and CCR GRIFFEY contribute generations of female-making strength, backed by RC Miss 600U 501F.
- N529 ranks in the top 2% for WW, CW and TI; top 1% for YW and ADG; top 5% for $GN and MARB; top 35% for HP; top 30% for Milk; top 3% for MWW; top 4% for MW; top 25% for DOC; and top 15% for API. He combines serious growth and carcass merit with a maternal foundation we know and trust.

- RVR TYSON N528 is a big-time spread bull, combining an 18.7 CE EPD, ranking in the top 5%, with a -3.3 BW EPD and 132.2 YW EPD. He also ranks in the top 10% for MARB, top 4% for API and top 10% for TI. He brings added frame and dimension in a heifer-safe package.
- Backed by HTP SVF IN DEW TIME and RC Miss 600U 501F, N528 traces to one of our most productive and marketable home-raised cow families. These Tyson sons blend the horsepower of ROSEDA POWERBALL23 F091 with the hoof shape, clean joints and maternal strength of our KANSA cow family. Tyson complements our Homelander and Hometown lines exceptionally well, and you'll see more of his sons in future sales.

- RVR TYSON 164N is a magnificent beast. We love him from every angle, and his video deserves a look. Better yet, come see him in person. He carries the pasture presence we're seeing in our RVR TYSON 429K sons, with tremendous dimension, a rugged build and an exceptionally sound structure.
- This cow bull delivers serious power and postweaning growth, ranking in the top 4% YW and top 3% ADG, along with top 2% CW, top 5% MARB, top 10% API and top 4% TI.
- His RC XCEED 063D dam adds another proven maternal foundation. We've seen the value of Xceed daughters firsthand, and our friends at Triangle J Ranch and Gibbs Farms, who purchased the bull, continue to reap the benefits of his daughters and granddaughters.

- One of the most impressive baldy bulls in the sale, he combines an incredible build with generations of proven donor cows behind him. Four generations back is the nationally recognized and prolific MAGGLE'S DANNY Z318, followed by daughters of W/C LOADED UP 1119Y, WBF SIGNIFICANT B132 and TJ GOLD 274G.
- That maternal foundation brings a different cow family and an outcross opportunity to our longtime customers.
- We leased TJ CHIEF 460G for one breeding season, and his daughters and granddaughters continue to produce the kind of cattle that stand out in the pasture and the sale pen.

- The TJ NORTH 528L sons bring calving ease with the body, capacity and look we want in our cattle. North has naturally serviced hundreds of heifers with no reported calving issues. This group offers options to calve heifers while keeping growth, maternal strength and carcass merit in the picture.
- RVR NORTH 137N is one of the most powerful, highest-growth TJ NORTH 528L sons we've seen. True to his sire, he is cool-made and wedge-shaped, with loads of belly and capacity. This solid black, shorter-tailed bull is backed by two of our best female-making sires, KBHR REVOLUTION H071 and MCM TOP GRADE 018X. His young dam brings fresh genetics rooted in a proven maternal foundation.

- RVR NORTH 117N is a strip-faced TJ NORTH 528L son backed by a G A R HOME TOWN dam. Home Town has proven his ability to deliver genetic merit across a wide range of economically relevant traits. Go deeper in the pedigree and you'll find G A R PREDESTINED and RC Miss 600U 501F, a cornerstone cow who helped shape the River Creek herd we know today.
- 117N is a sleep-all-night heifer bull who still ranks in the top 35% for WW and YW, with top 15% MARB and DOC and top 10% $GN. He offers calving ease without giving up the growth, carcass merit and disposition that matter long after the calves hit the ground.

- RVR QUADRANT 152N is a 3/4 SM 1/4 AN bull who offers an outcross route to producing purebreds. Big-bodied, stout and eye-appealing, he carries the rugged look we want in a bull headed out to breed a set of commercial Angus cows.
- He ranks in the top 2% for WW, top 5% for YW, top 20% for ADG and MW, top 30% for Milk, top 4% for MWW, top 10% for DOC, CW and YG, top 1% for REA and top 15% for TI. He brings added pounds, muscle and maternal strength in a pedigree that gives our longtime customers mating flexibility.

- Another powerful 3/4 SM 1/4 AN son of RUBYS QUADRANT 210K, he is loaded with red meat and muscle. SCHOOLEY HAGGARD A411H adds to a pedigree stacked with elite donors, including WS MISS SUGAR C4, RUBYS LINDA 721E, TJ 22X and SCHOOLEY MISS 3000A 823F.
- We see real opportunity in these Quadrant descendants as the packing industry places greater emphasis on accurately measuring carcass composition and rewarding red meat yield.

- Use SCHOOLEY HAGGARD A411H sons to produce elite replacement females with tremendous carcass merit.
- RVR HAGGARD 133N is a rugged, heavy-made bull out of a CCR PAYWEIGHT 0327C daughter. These cows seem to last forever, consistently producing stout, top-end bulls that our commercial customers appreciate.
- 133N combines top 10% DMI and MARB, top 15% DOC and CW, top 25% CER and API, top 30% TI and top 35% STAY. He brings together maternal staying power, favorable intake genetics and carcass quality in a stout, practical package.

- RVR Deadwood 5006 is a direct son of Poss Deadwood, the number 1 TI sire among the top 500 most-used bulls across all breeds in the American Simmental Association's new research EPD release. His dam, EXAR Joy 6079, was a featured lot in a past Express Ranches sale.
- 5006 is well-made and nicely balanced, with top 10% WW and YW, top 20% CW and $W, top 5% $G, top 10% $B and top 25% $C. He offers growth and carcass merit with the flexibility to produce straight Angus or percentage Simmental cattle.

ABERAN CHURCHILL 034J / Sire

- RVR Churchill 4147 combines G A R Home Town with donor Vintage Blackbird 1525, a Connealy Clarity daughter out of the powerful Spruce Mtn Blackbird 6085 cow. Home Town and his progeny stand out in the American Simmental Association's research EPD release for API and TI, backed by female records across multiple breeds in the IGS system.
- 4147 brings that proven foundation together with top 3% $B and top 1% $C, posting an impressive $423 $C. He offers a strong combination of maternal genetics and carcass value for customers looking to add profitable Angus genetics to their herds.

- In the past, a female of RVR MISS HOMELANDER 022N's caliber would have stayed here under any circumstances. But we've committed to offering our entire spring bred heifer group, and that includes our very best.
- 022N is the fanciest, highest-quality KBHR HOMELANDER J071 heifer we've ever raised. She makes you reconsider what is possible when designing SimAngus cattle.
- Her bull calf by RFS Northern Exposure N14 could be a future sale highlight if you choose to send him back through our customer program.
- 022N has big-time donor potential. In her quality, presence and genetic merit, she is the baldy female version of our now deceased herdsire KBHR MONACO M021.

ADV COMPASS L3574 / Sire to Lot 91

- RVR MISS COMPASS 073N has been a standout since birth, and her picture doesn't do her justice. She is a smooth-made powerhouse, big-boned, huge-footed and sound as a cat.
- We purchased ADV COMPASS L3574 after evaluating sons of HOOK'S GALILEO 210G and deciding he offered the most complete package. Her dam came to us as an elite open heifer from our friends and partners at Keller Broken Heart Ranch. Every time Jeremie Ruble visits, he refuses to leave without seeing her. We suspect he'll retain visitation rights after the sale.
- She backs that presence with top 2% WW and CW; top 1% YW, ADG and TI; top 35% $GN; top 30% MCE, STAY and DOC; top 25% Milk and REA; top 3% MWW; and top 5% MW, MARB and API. She has the genetic merit to stand at the forefront of any Simmental program.
- Safe in calf to RFS Northern Exposure N14, she carries one of the most anticipated purebred Simmental matings we've ever made. Females like this keep us excited about what comes next. 073N is a masterpiece, and we'd be proud to send her to any herd in the country.

- RVR MISS HOMELANDER 414N continues a strong KBHR HOMELANDER J071 offering with the quality we expect at River Creek. Her RC XCEED 063D dam adds a proven maternal foundation. Xceed has been one of our most dependable female makers, siring attractive daughters with exemplary udders and genetic strength in DMI, Milk, STAY, CER and MARB.
- 414N ranks in the top 10% for WW, MWW and MW; top 4% for YW, ADG and DOC; top 35% for $GN and BF; top 5% for HP; top 25% for Milk; and top 1% for CW, MARB, API and TI. After closely studying the upcoming API and TI changes, we believe she is positioned to benefit from her strength in the traits carrying the most emphasis.
- She sells safe in calf to BLPF Landman L21, doubling up on our late Homelander's influence. Landman adds the maternal functionality of his TJ STONE COLD 336G dam and the opportunity for a striking baldy calf. This is a mating we're excited to see.

- RVR MISS KODIAK 413N is a standout PB SM daughter of our late $110,000 herd sire, TERS KODIAK 206K. We quickly learned that making fancy daughters was his specialty. We love their teat and udder structure, along with the presence they carry in the pasture.
- Out of RVR MISS REVOLUTION 238K, 413N carries a calf by TJ Flex 699N that will be among his first in the country. We're excited to see this mating combine Kodiak's maternal quality with the promise of Flex.

RVR MISS KODIAK 412N / Lot 94

- 412N was so deep-bodied when she came home from our cooperator herd as a calf that we had her pregnancy checked! That kind of natural body and capacity gives her tremendous brood cow appeal and exciting donor potential.

AI'd on 5/23/2026 to TJ Flex 699N (4528063). Safe with heifer calf due 3/2/2027. Mating ranks in the top 4% MARB, top 10% $API, $TI, top 15% BW, top 25% CE, WW, YW.

- RVR MISS KANSA 055N leads off our featured RUBYS QUADRANT 210K daughters with a striking side profile and undeniable pasture presence. Upheaded, with a beautifully shaped head and wide muzzle, she carries her neck cleanly out of the top of her shoulder and moves with exceptional ease.
- Quadrant contributes hoof shape and size, dimension, fleshing ability and maternal quality, along with the hair shedding and fescue adaptability we value. 055N carries on the KANSA cow family's standard, backed by two shots of MCM TOP GRADE 018X, one of our most influential female makers.
- She sells safe in calf to TJ Flex 699N with a heifer pregnancy. This is the kind of PB SM female you can build a herd around.

- 416N, a full sister to Lot 1, and 425N are powerful paternal sisters with closely related maternal pedigrees. Both are sired by KBHR HOMELANDER J071 and out of dams backed by ROSEDA POWERBALL23 F091 and G A R ASHLAND. Both sell safe in calf to BAS New Heights M4042.
- The positive reports, photos and videos of New Heights calves keep coming, and our own calves have us wishing we had more. They are sharp-made, deep and stout, with excellent structure, dark black color and mostly blaze faces with little extra white.
- We believe in both of these females. The easiest way to make sure you get the best one is to buy them both. They bring together proven genetics in a fresh combination, with matings we're excited to see.

TI	$125	1

- The #1 API SimAngus female in the database, RVR MISS HOMELANDER 016N is off the charts. She is a genotypic freak in the best way. She represents years of selecting the best available Simmental and Angus genetics and layering their strengths to capture the best of both breeds. She has developed considerably since picture and video day, and you need to see her in person before the sale.
- For a serious, commercially focused seedstock producer, the value of a female like 016N extends well beyond her own production. The opportunity to build and multiply these genetics is what makes her so exciting.
- She sells safe in calf with a heifer by W/C Headshot 957M. The planned mating ranks in the top 1% for API and TI, top 2% for CE, top 3% for MARB, top 10% for BW, top 15% for WW and top 20% for YW. With the phenotype and blaze faces Headshot is transmitting to his first calf crop, this heifer calf could have big-time donor potential.

- RVR MISS JAMESON 419N is an absolute beast of a heifer, and her picture doesn't do her justice. Watch her video, or better yet, make the trip to River Creek to see her in person. Her paternal brother is Select Sires' featured SimAngus sire, RUBYS GENERATIONAL 514N.
- Prior to the sale, we were approached by several respected breeders about partnering on Generational. We passed because we already had BASIN JAMESON 1076 sons and daughters of this caliber and had secured the Linda cow family through RUBYS QUADRANT 210K and our purchase of Ruby Cattle Co.'s entire fall bred heifer group a few years ago. Females like 419N reinforce our confidence in those decisions.
- She sells safe in calf to KBHR Crucible N131, our new featured 1/2 SM 1/2 AN sire. We see him as a higher-calving-ease, lighter-birthweight counterpart to our influential KBHR HOMELANDER J071, with a fancier front and looser structure. She carries what will be one of the first Crucible calves born.

- RVR MISS TYSON 061N leads off our RVR TYSON 429K daughters. A former high-selling bull, Tyson has become even more valuable with use, combining ROSEDA POWERBALL23 F091 with our time-tested, rancher-approved KANSA cow family. His calves deliver tremendous performance, added frame and length, along with the sound structure and hoof quality we demand.
- 061N sells safe in calf to BLPF Landman L21 with a heifer pregnancy, bringing together two of our most proven and powerful SimAngus lines. Landman adds the opportunity for a baldy heifer with exceptional genetic merit. Our good friend and business partner Terry Bowen of Lonesome Pines Farm in Prattville, Alabama, shares our enthusiasm for both 061N and this mating.

AI'd on 5/22/2026 to RFS Northern Exposure N14 (4558247). Safe with bull calf due 3/1/2027. Mating ranks in the top 10% BW, MARB, $API, $TI, top 15% CE.

- RVR MISS HABANERO 033N is the natural calf of our late donor, CLRS HABANERO 0115H, a granddaughter of CLRS ALWAYS XCELLENT, the most influential cow in the Clear Springs program. This family has consistently produced influential herd sires, including CLRS Guardian and CLRS Homeland. That proven production is why we selected her dam from the Clear Springs Mature Cow Herd Dispersal Sale, and 033N offers the opportunity to carry her maternal legacy forward.
- She sells safe in calf to RFS Northern Exposure N14 with a bull pregnancy. We see the potential for that calf to pay for the cow, making this an exciting opportunity to invest in a proven maternal line with herd sire production behind it.

- RVR MISS KANSA 803N leads off our featured TJ NORTH 528L daughters, blending North's strengths with our time-tested KANSA cow family. Her dam is a daughter of RVR ROGUE 530H, a former high seller in our AI lineup, with S A V BISMARCK 5682, MCM TOP GRADE 018X and SS GOLDMINE L42 further strengthening her maternal pedigree.
- We selected TJ NORTH 528L at Triangle J in 2024 to bring dependable calving ease to our solid black power heifers and offer customers a baldy option for heifer breeding. His combination of calving ease, maternal merit and a blaze face gives him a valuable place in our breeding program.
- 803N sells safe in calf to RFS Northern Exposure N14 with a bull pregnancy. We're excited about this mating!

- RVR MISS QUADRANT 032N is one of the few heterozygous black females in our herd. We select for homozygous black and homozygous polled cattle, so when a red gene survives five generations, you know the females carrying it have earned their place.
- This baldy 3/4 SM 1/4 AN offers an outcross opportunity for breeders looking to produce red baldies with real-world commercial appeal. She combines the look and build of RUBYS QUADRANT 210K with the influence of her maternal grandsire, W/C RAPID FIRE 2101C. Her pedigree is backed by big-time donors RUBYS LINDA 721E, WS MISS SUGAR C4, CCR MS 4045 TIME 7322T (Apple), DRAKE SOFT TOUCH 15M and BAR15 MISS KNIGHT83Y-78E. 032N has donor potential written all over her.
- 032N sells safe in calf to RFS Northern Exposure N14 with a bull pregnancy, and we would welcome her son back into a future River Creek Bull Sale.

W/C RAPID FIRE 2101C
Maternal Grandsire

- TR Ms Tilda 5173N deserves your attention when she comes to the auction block. We purchased a semi-load of Angus heifers from Thomas Ranch in Harrold, South Dakota, and are offering a few to showcase their quality while retaining a portion for our SimAngus program. 5173N is a standout in her build and presence, and her video deserves a look.
- She sells ultrasounded safe with a bull calf by RVR Victory M404, the only Angus bull in our AI lineup. Victory is sired by 44 VICTORY and backed by a maternal connection to G A R Sure Fire. This is an opportunity to own a female with donor potential straight from the heart of the Thomas Ranch herd

PE from 4/25/2026 to 6/24/2026 to RVR Victory M404 (4591293). Ultrasounded safe, calf due 3/14/2027.

- TR MS Emma 5052N brings generations of maternal history together with figures that support long-term earning potential. She is sired by 44 Right Kind 1771, an SG Salvation son out of 44 Lucy 7315, a K C F Bennett Citation daughter.
- The Emma family is a cornerstone at Thomas Ranch in Harrold, South Dakota. We traced her maternal line back 17 generations, through Sitz Ranch, to Emma E 22, AAA 503363, born in 1935. This is the kind of foundation you build a herd on.
- She sells safe in calf to RVR Victory M404, a 44 VICTORY son, adding another promising mating to a female with a deeply rooted maternal foundation.

CALVING

Feb. 16 to May 7, 2027

SIRES

Schooley Haggard A411H
River Creek SimAngus Bulls

ABOUT THE HEIFERS

A rare opportunity to build your cowherd with 250 uniform, reputation F1 Black Baldy females of South Dakota origin. Predominantly sired by polled Hereford bulls and out of Angus cows, these heifers bring a proven maternal foundation to their matings with River Creek SimAngus genetics.

The resulting calves will combine Hereford, Angus and Simmental genetics in a three-breed cross, putting hybrid vigor to work across the calf crop. Expect steers with the growth and performance to excel in the feedlot and heifer calves worth keeping. The Schooley Haggard matings are especially exciting for producing top replacement females with the udder quality and longevity we value in his daughters.

Purchased as one uniform group and managed together since acquisition, the entire offering is black white-faced. Heifers were AI bred to Schooley Haggard, with the first AI service on May 9, then exposed to high-calving-ease River Creek SimAngus bulls purchased in our 2026 Bull Sale. They will come off grass and return to River Creek the last week of October. Call 785-458-9494 to view.

150 COMMERCIAL ANGUS BRED HEIFERS

SELLING IN PACKAGES OF 5

LOCATION

River Creek Farms
Manhattan, KS

CALVING

Feb. 16 to May 7, 2027

SIRES

WS Paid N Cash
River Creek SimAngus Bulls

ABOUT THE HEIFERS

Build your cowherd with 150 uniform, solid black commercial Angus heifers of South Dakota origin, bred for calves that come easy, grow fast and give you options at weaning. Purchased as one group and managed together since acquisition, these females offer an exciting foundation for productive SimAngus replacements and premium feeding cattle.

Heifers were AI bred to WS Paid N Cash, our new blaze-faced spread bull. His picture may not show it clearly, but Paid N Cash carries a blaze face, adding the opportunity for sharp-looking baldy calves. He combines top 10% CE and top 1% BW with top 10% WW and YW, top 3% MARB and top 2% REA. Expect easy-born calves that get up and grow, with heifer calves worth building around and steers that bring growth, muscle and carcass quality to the feedlot.

The first AI service was May 9, followed by exposure to high-calving-ease River Creek SimAngus bulls purchased in our 2026 Bull Sale. Heifers will come off grass and return to River Creek the last week of October. Call 785-458-9494 to arrange a time to view.

SALE FORMAT

Heifers sell in groups of five head, matched by type and kind. The heaviest, earliest-calving groups will sell first.

WEIGHTS & DETAILS

Updated individual weights and group averages will be available the week of the sale. Please contact us to schedule a time to view the heifers.

DELIVERY

FREE delivery anywhere in the continental United States. We'll coordinate with buyers to arrange delivery as soon as possible following the sale.

GUARANTEE OF EMBRYO PURCHASES

The seller guarantees that each embryo package contains Grade 1 and/or Grade 2 embryos collected and frozen by a reputable facility. All embryos offered are conventional ET or IVF embryos suitable for direct thaw. Grade 2 embryos carry the same guarantee as Grade 1 embryos. Only quality embryos from reputable facilities will be represented in this offering.

SPECIAL GUARANTEE

Unless otherwise noted, sellers of embryo lots will guarantee the establishment of at least one 60-day pregnancy per three embryos transferred, if the following conditions are met:

A. The transfers must take place within 365 days of the sale date.
B. Transfers are performed by a licensed embryologist.
C. Buyers of embryo packages that fail to establish at least one pregnancy will be given credit, or additional embryos from the seller from the same mating, or if the buyer chooses another of similar value.

8	1.9	125	194	88	17	18	92	1.47	1.26	207	135
		1%	2%	1%	40%	15%	1%	1%	1%	1%	1%

- Our $200,000 high-selling selection from the 2025 Keller Broken Heart Ranch sale, KBHR MONACO M021 has generated more calls and semen inquiries than any bull in our lineup. Those who saw him in person understand why. A true phenotypic standout, Monaco offered even more performance than his sire in a 3/4 SM package, combining exceptional growth and marbling with the look to attract commercial cattlemen and purebred breeders alike.
- Demand has reflected that confidence. Twenty units offered individually in our January live online sale averaged $3,080 per unit, and embryos by Monaco were in high demand late last spring. To see his calves is to believe the hype. Now approaching weaning, his first calves have exceeded our expectations. They were born right, have grown rapidly and carry tremendous muscle, presence and quality. Monaco stamps his progeny with a consistency we've rarely seen from any bull we've owned or used. If you're familiar with his sire, Homelander, think longer, wider, heavier-muscled and cleaner-fronted.
- Unfortunately, we lost Monaco in August to a rare medical condition. Every unit becomes harder to part with, especially after seeing these calves. This limited offering is an opportunity to produce powerful, marketable sons and elite replacement females from genetics we intend to build around. Take advantage of our willingness to share. Future offerings are uncertain, and we may reserve the remaining inventory for use within our own herd.

10%	10%		40%	25%	2%	40%	50%	1%		1%	2%

- RFS NORTHERN EXPOSURE N14 was our $100,000 high-selling selection from the 2026 Rydeen Farms sale, purchased alongside our partners at Keller Broken Heart Ranch and Lonesome Pine Farms. His combination of calving ease, elite marbling, sound structure and substantial muscle and rib made him a priority acquisition.
- The first son of Bridle Bit Prelude L372 offered at public auction. His full sister, RFS Miss N6, topped the open heifer division at $110,000, with River Creek bidding until the end. RFS PRELUDE N57 is only the second Prelude daughter offered at public auction, further highlighting how few opportunities breeders have had to access this cow family.
- We've believed in Prelude from the beginning. The #1 marbling female when she sold, she commanded $200,000 as an open heifer after we stayed in the bidding to $195,000. This impressive Genesis daughter has become a cornerstone donor at Rydeen Farms, backing her presence, disposition, fertility and mothering ability with an outstanding first set of progeny.
- We believe Northern Exposure has the potential to be our next great bull. Losing Homelander and Monaco sooner than we ever expected reinforced how quickly access to exceptional genetics can change. Limited semen is available in this offering, and we encourage you to secure what you need while the opportunity is here.

10%	5%				2%			3%		2%	15%

- TJ FLEX 699N was Lot 1 in this year's Triangle J Ranch Sale and, in our eyes, the highest-quality individual in the offering. This TJ HEISMAN 388F son combines unusually high calving ease and low birth weight with the maternal strength of a TJ Gold dam. We value the Gold daughters as productive cows that consistently turn out high-quality seedstock, and we wanted more of that influence in our herd.
- Flex earned his name with his skeletal flexibility. He has exceptional hooves with distinct toe separation, a fluid stride and a cocky, upheaded look. He always seems ready for his picture. Beyond Gold, his pedigree brings fresh outcross genetics to our lineup.
- Dale Werning is a man of few words and isn't easily impressed, but he loves Flex's design and skeletal build. The Werning family knows what good cattle should look like, and their appreciation reinforces our own confidence in him.
- Until now, Flex has been used exclusively at River Creek Farms and Werning Cattle Company. We're excited to share a bull who brings calving ease, maternal strength and exceptional structure together in one impressive package.

3%	25%	10%	10%	25%	10%	10%	5%	1%	5%	1%	1%

- KBHR CRUCIBLE N131 is a maternal brother to KBHR HOMELANDER J071, out of the renowned KBHR MEDORA G132. His granddam, BAR CK MS X38 106Z, has left an extraordinary mark on SimGenetics through her ability to consistently transmit marbling and exceptional udder quality.
- Sired by G A R FIREPROOF, Crucible builds on that maternal foundation with a look and structure we love. The Fireproof-influenced SimAngus cattle we've seen have been well-made, with easy-fleshing daughters and excellent udders. We believe Crucible offers the strengths that made Homelander so influential, with higher calving ease and lighter birth weight. He is nicer-headed and longer-necked, with more shoulder slope, greater reach up front and a long, loose stride.
- Homelander's impact on River Creek will always be appreciated, and having Crucible has softened the blow of losing him. He is carrying the torch for a cow family we trust, and we expect him to become a widely used sire with a lasting influence.

PLANNED MATING: PUREBRED SIMMENTAL

CE	BW	WW	YW	MWW	DOC	CW	MRB	REA	$API	$TI
9	2.5	117	180	83	18	67	.98	1.05	190	119
		1%	1%	1%	5%	1%	1%	20%	2%	1%

- ES Miss Scarlett L141 was our pick of the open heifers at Eichacker Simmentals, and she has exceeded every expectation since day one. This baldy PB SM commands attention with her presence, sound structure and bold, powerful design. Big-footed, long-bodied and thick-ended, she combines the look we want with real-world functionality. She backs it up with top 1% WW, top 2% YW, top 15% MARB and API, and top 4% TI. Scarlett has become a cornerstone donor, producing elite purebreds and high-end SimAngus cattle. She graces our sale cover, and these are the only Scarlett genetics offered this fall.
- Her pedigree brings together two influential Simmental cow families. Her dam, HHS Miss 836Z, is a proven GW Predestined daughter whose influence includes HHS Mr Entourage 867B, sire of LCDR Anthem 33K, LCDR Patriot 8K and LCDR Reserve 210J. Her sire, LCDR Impact 134F, was an early standout son of WS Miss Sugar C4, commanding $130,000 as the high-selling bull at Lazy C Diamond's 2019 Production Sale. Scarlett's daughter, RVR MISS SCARLETT 075N, sells as Lot 105.
- Look for Scarlett progeny to begin headlining River Creek sales in 2027. Her spring-born, blaze-faced Monaco bull calf currently ranks #1 in the ASA database for WW, YW and TI, posting an all-time high TI of 130.5. He is as good as we know how to make one, and a simple cellphone video taken in the pasture went viral within half an hour. Scarlett is already showing us what a program-changing cow can do.
- **TERMS OF IVF CYCLE**: Available to flush after January 15, 2027. Buyer will receive a minimum of six transferable embryos and two 60-day pregnancies with no cap. Buyer pays IVF charges, semen cost and all freezing and/or transfer fees.

606 **1 IVF Cycle** *AVAILABLE AFTER JAN 15 2027*

- W/C BLACKCAP MAY 3104L may be the most complete female ever produced at Werning Cattle Company. She was our pick of the bred heifers in their 2025 sale, and Dale Werning wasn't eager to let her go. Knowing she would become a headliner in our SimAngus donor program helped take some of the sting out of that decision.
- This beautiful brockle-faced female combines RFS HEAVY HITTER H45, a bull we've long admired, with S A V BLACKCAP MAY 4136D, a phenomenal Angus cow backed by one of the breed's most influential maternal families. 3104L brings an exceptional look together with top 15% WW and top 10% YW, offering fresh outcross genetics for our program. Her first calf, RVR STATESMAN 167N, sells as a feature bull in this year's fall sale.
- Her mating to KBHR MONACO M021 brings together genetics from River Creek Farms, Keller Broken Heart Ranch, Werning Cattle Company, Rydeen Farms and Schaff Angus Valley. Proven cow power, exceptional phenotype and the performance of Monaco. Let that sink in while you click the bid button!
- **TERMS OF IVF CYCLE**: Available to flush after January 15, 2027. Buyer will receive a minimum of six transferable embryos and two 60-day pregnancies with no cap. Buyer pays IVF charges, semen cost and all freezing and/or transfer fees.

PLANNED MATING: PUREBRED SIMMENTAL

CE	BW	WW	YW	MWW	DOC	CW	MRB	REA	$API	$TI
10	1.2	110	172	79	16	74	1.11	1.11	196	121
50%		1%	1%	3%	15%	1%	1%	15%	1%	1%

- You know she's great when a cow's name is derived from the breeder's wife. A compliment that speaks to how highly we regard this female. Much like her namesake, she is the epitome of class and style. This striking blaze face female is beautifully proportioned and flawless in her structure. She first caught our attention with her look but after studying her extended pedigree, we knew we had to own her or die trying.
- Her sire, Schooley Knight 739K, is our favorite son of the immortal Schooley Miss 3000A 823F that we don't own. What sets Knight apart is his sire, CLRWTR Game Changer H4A, who adds frame and mass while bringing together TJ Miss New Day U14, the dam of TJ Main Event 503B, and WS Miss Sugar C4. That combination layers another generation of power and maternal strength onto one of the Schooley program's most productive cow families.
- Elizabeth's maternal pedigree brings in our elite herd sire KBHR Revolution H071 and the Donna family stemming from Coleman Donna 386. Across her extended pedigree, the influence of Sugar C4, Schooley 823F, New Day U14, LLSF Urababydoll U194, and Donna 386 creates an impressive concentration of proven breeding females. These are cow families that have earned their reputations through productive daughters and influential sons.
- We have already produced a flush of full siblings to the embryos offered, and the calves are dynamite. They resemble bigger outlined, stouter, jet-black versions of Miss Elizabeth, giving us tremendous confidence in this genetic combination. An embryo offering that brings together this level of phenotype, pedigree depth, and genetic merit is difficult to replicate. When you see the calves, you'll understand the excitement.

		1%	1%	2%	30%	1%	1%	5%	2%	1%

- SCHOOLEY MISS 3000A 823F is the kind of cow that earns her reputation through production. With 127 progeny recorded with ASA, she is the dam of SCHOOLEY HAGGARD A411H, SCHOOLEY KROWN 28K, SCHOOLEY KNIGHT 739K and SCHOOLEY MISS 823F 068H, Haggard's full sister. Her influence reaches another generation through 068H's high-selling Kodiak sons at Schooley Cattle Company.
- 823F combines prolific production with the ability to make cattle that breeders want to own. Her sons have earned places in breeding programs, and her daughters are proving capable of carrying that legacy forward. Her natural son, RVR KODIAK N599, sells in this offering, giving buyers another look at the quality she consistently delivers.
- When the opportunity came to own 823F, we couldn't wait to work with Gerald to bring her into the River Creek donor program. We continue to flush her to our strongest sires and put in the embryos we don't offer publicly. Expect to see more of this cow family in future River Creek sales. She is proven cow power, and we're building around her.
- **Lot 608B / Recip Pregnancy.** Tattoo J411. Due February 13, 2027. Confirmed heifer pregnancy. Buyer pays for delivery.

		10%	10%	25%	15%	1%	2%	45%	10%	2%

- CLRS DAIRY QUEEN 606D has proven herself as a cornerstone donor with the ability to consistently produce cattle that command attention both in the sale ring and the show ring. A daughter of the influential After Shock, Dairy Queen first made her mark at JS Simmentals before commanding $74,000 in the 2023 Midwest Made Elite Female Sale, where she was selected by Hilltop Simmentals. Her production record speaks volumes, highlighted by JS KEEPIN IT 90 39H and JS DAIRY QUEEN 57G, the 2021 Iowa State Fair Grand Champion Female.
- What makes Dairy Queen so special is her ability to transmit tremendous rib shape, body capacity and exceptional structural quality to her offspring. These are the kind of real-world traits that never go out of style, and she has proven she can pass them on through both sons and daughters.
- We believe the mating to KBHR MONACO M021 has tremendous potential. Combining Dairy Queen's proven phenotype and production history with Monaco's growth, muscle and carcass merit offers an exciting opportunity to produce cattle with the look, power and genetic value to make an impact. When a cow has already proven she can produce at this level, we want to build on that success.

- MISS R PLUS 3007A is a sale feature no matter the place or time. Recognized as one of the truly elite females in the Simmental breed, she has built a reputation for producing cattle that top sales, compete at the highest levels in the show ring and become cornerstones of progressive breeding programs.
- Featured as Lot 1 in the historic 2022 R Plus Dispersal, 3007A has a production record that speaks for itself. Her daughter commanded $130,000, while a son had previously sold for $150,000. With 42 progeny recorded with the American Simmental Association, she has proven her ability to consistently generate cattle with tremendous value. Simply put, she's an absolute beast from north of the border, and her influence continues to extend through both sons and daughters.
- We believe the mating to KBHR MONACO M021 is power on power. Combining 3007A's proven ability to produce elite, marketable cattle with Monaco's tremendous growth, muscle and carcass merit creates an exciting opportunity. When you have a cow that has repeatedly demonstrated this level of production, the possibilities are hard not to get excited about. We expect this mating to work exceptionally well.

		2%	2%	5%	40%	2%	4%	5%	10%	2%

- For Simmental breeders, ES A110 needs no introduction. This front-pasture donor from Eichacker Simmentals in Salem, South Dakota, has earned her reputation as one of the great breeding females in the program. With 127 progeny recorded with the American Simmental Association, she has proven her ability to produce outstanding cattle across multiple matings, year after year. Simply put, A110 works!
- This homozygous black, homozygous polled blaze-faced daughter of REMINGTON LOCK N LOAD 54U is the kind of cow that makes you appreciate the fundamentals of good cattle. She is exceptionally sound, upheaded, thick from end to end and carries a tremendous sweeping rib cage. Her maternal pedigree combines O C C PAXTON 730P, ES DAKOTA NK68 and WHF DESPERADO 212G, bringing generations of proven genetics to the table.
- Her production record is highlighted by ES RIGHT TIME FA110-4, the $20,000 high seller in Eichacker's 2019 bull sale who went on to become an influential herd sire for CK Cattle Company. A110 has been the foundation behind many of the front-end bulls and females at Eichacker Simmentals, and her ability to consistently transmit quality is what makes her such an exciting breeding piece.
- The mating to KBHR MONACO M021 combines A110's proven maternal strength, structural quality and exceptional phenotype with Monaco's growth, power and marbling. We believe this is the kind of mating that can produce cattle with tremendous value for both commercial cattlemen and seedstock producers. When you combine two genetics packages that have proven they work, sometimes it really is as simple as K.I.S.S. Keep It Simple, Stupid!

		2%	3%	4%	15%	2%	1%	40%	2%	1%

- RVR Miss Medora 426L offers an exciting opportunity to invest in one of the most influential cow families in the Simmental breed. A direct daughter of KBHR Medora G132, she is a maternal sister to the legendary KBHR Homelander J071, the exciting young KBHR Crucible N131, and RFS Traveler L23 and RFS Credentials L49 from Rydeen Farms. Few young females can boast this kind of herd sire-producing power in their immediate pedigree.
- Her maternal granddam is none other than the famed BAR CK MS X38 106Z, the foundation behind an extraordinary lineup of breeding bulls including KBHR Cimarron, Global, Bold Ruler, High Heat and Quigley, along with influential daughters Medora and Debutante. This is a cow family that has proven its ability to produce generation after generation of cattle with genetic merit and tremendous breeding value.
- We are already seeing the potential in 426L. Her GAR Wallace bull calves from our spring 2026 calf crop have caught the attention of some astute Simmental breeders, and we believe her best days are still ahead. The mating to KBHR MONACO M021 brings together proven genetics from the Medora family with Monaco's growth, muscle and carcass merit. With this much breeding influence stacked into one pedigree, we believe this is an exciting opportunity to build on a truly exceptional maternal foundation.

CE	BW	WW	YW	MWW	DOC	CW	MRB	REA	$API	$TI
10.8	0.5	113.9	178	81.2	17.1	67	.99	1.08	196.8	122
		1%	1%	2%	10%	1%	1%	15%	1%	1%

- Some females earn their way into the donor pen, and RVR Miss Revolution 280K did exactly that. This blaze-faced daughter of KBHR Revolution H071 was our best purebred Simmental bred heifer in the K model group and the very first female we selected to flush from our 2024 first-calf group. We believed in her from the beginning, and everything she has done since has only reinforced that decision.
- With 29 progeny recorded with the American Simmental Association, 280K has already made her mark in our embryo transfer program. Her flushes to KBHR Monaco M021 and GAR Wallace have been exceptional, producing multiple blaze-faced calves with the kind of phenotype that stops you in your tracks. These calves stand out even in pastures full of ET progeny from some of our most proven donors and leading sires, and several will be featured in our 2027 sales.
- 280K is the kind of cow we believe the Simmental breed needs more of. Feminine, moderate framed, beautifully balanced and equipped with a textbook udder, she combines exceptional phenotype with real-world functionality. At no more than 1,200 pounds, she represents the moderate, productive cow size we believe will become increasingly valuable as mature cow weight receives greater consideration in genetic selection. Her pedigree is backed by a Hook's Eagle 6E dam out of an MCM Top Grade 018X daughter, adding another layer of proven genetics to an already impressive female.
- We are especially excited about the Monaco mating because we have already seen what this combination can produce. If you've seen one of those eye-catching Monaco calves on a River Creek social media feed, chances are it came from 280K. This is an opportunity to get ahead of a young donor we believe has a tremendous future, and we couldn't be more excited to share these genetics.

		1%	1%	2%	10%	1%	1%	10%	2%	1%

- RVR Miss Kansa 262K is the kind of female that makes you stop and take a second look. This striking, full-faced baldy daughter of KBHR Revolution H071 is slick haired, jet black and moderate framed, yet carries tremendous body, substance and power in a beautifully balanced package. Add in her exceptional udder quality, and you have the kind of functional, eye-appealing female we strive to build our donor program around.
- The Kansa cow family has been a consistent source of quality and profitability at River Creek Farms. 262K is a maternal sister to RVR Tyson 429K, the high-selling bull of our 2024 sale, and comes from the same maternal foundation as RVR Miss Kansas 436K, another female we believe has a tremendous future in our program. Her pedigree combines the influence of WS All-Around Z35, MCM Top Grade 018X and SS Goldmine L42, bringing generations of proven maternal genetics together with the growth, carcass merit and phenotype of her $75,000 sire, KBHR Revolution H071.
- We believe the mating to KBHR Monaco M021 takes this combination to another level. Projected EPDs place these embryos in the top 1% for $API, $TI and marbling, offering an exceptional blend of maternal strength, performance and carcass value. When you combine a cow family that has already produced sale-topping cattle with this kind of genetic potential, the possibilities are exciting. Whether your goal is to produce your next herd sire or a set of replacement females to build around, this mating deserves serious consideration.

- Some cows just have that look, and RVR Miss Revolution 819K is one of them. One evening last spring, my nine-year-old daughter, Madden, and I were driving down the lane at Cross Country Genetics when a cow standing on a nearby hillside caught her attention. “Wow, Dad, who owns that one?!” We pulled a little closer and read the tag, 819K. That pretty well sums up this female. Big bodied, long made, powerful and commanding in her presence, she has the kind of phenotype that makes people stop and take a second look.
- A daughter of KBHR Revolution H071, 819K combines the proven maternal influence of WS Miss Sugar C4 with an outstanding Angus foundation. Her dam, PA Rita 533-8321, was our high-selling selection from the 2019 Peterson Angus Sale, and that investment continues to pay dividends. This maternal line has consistently produced the kind of cattle we believe in, and 819K is a prime example of what happens when proven genetics and exceptional phenotype come together.
- We are excited to offer two different matings from this tremendous female, each bringing something unique to the table. The mating to KBHR MONACO M021 combines 819K’s impressive body, power and maternal foundation with Monaco’s exceptional growth, muscle and carcass merit. The mating to RVR JORDAN23 478L brings in our $61,000 high-selling bull from the 2025 River Creek Farms sale, adding another powerful genetic package backed by the Roseda Powerball23 sire line.

		3%	4%	4%	40%	2%	1%	10%	1%	1%

- There are certain cow families you simply cannot afford to overlook, and RFS Prelude N57 represents one of the most exciting opportunities we've had to invest in elite Simmental genetics. N57 is only the second daughter of BRIDLE BIT PRELUDE L372 to be offered at public auction, and anyone familiar with this family knows just how special that is.
- We were determined to own Prelude herself, the exceptional Genesis daughter who ranked as the #1 marbling female. We stayed in the bidding all the way to $195,000 before she ultimately commanded $200,000 as an open heifer. Although we didn't bring her home, we never stopped pursuing this cow family. Prelude has since established herself as a cornerstone donor at Rydeen Farms, combining tremendous presence, outstanding disposition, fertility and mothering ability with a production record that is already turning heads.
- Her first set of progeny has been nothing short of remarkable. RFS Miss N6 commanded $110,000 as the high-selling open heifer at Rydeen Farms, and we were right there bidding, trying to add her to our donor lineup. Her maternal brother, RFS Northern Exposure N14, was our $100,000 high-selling selection from Rydeen's 2026 sale, purchased alongside our partners at Keller Broken Heart Ranch and Lonesome Pine Farms. His exceptional combination of calving ease, elite marbling, structural soundness, muscle and rib made him a bull we simply weren't going to let get away.
- Now we have the opportunity to build on that same maternal foundation through N57, a daughter of CCR Cochise 4142H. The mating to KBHR MONACO M021 brings together two of the breed's most exciting cow families for marbling while adding tremendous growth, muscle and power. We believe this combination has the potential to produce the next generation of standout herd sires and donor females. After pursuing this cow family through multiple sales, we're excited to finally offer genetics from a female we believe can carry Prelude's influence forward for years to come.

- RFS Miss N17 brings together two of the most exciting maternal foundations in the Simmental breed, the legendary Medora cow family and the proven WS Sweet Sixteen F16 line. Featured as the only RFS Roll Call daughter in Rydeen Farms' 2026 offering, N17 combines an attractive phenotype with a pedigree stacked full of influential herd sires and productive females. This is the kind of young female we believe has the genetic foundation to become a tremendous breeding piece.
- On the maternal side, N17 is a direct daughter of RFS Miss L48, a Gibbs Essential daughter out of KBHR Medora G132. L48 is a full sister to RFS Traveler L23 and RFS Credentials L49, connecting N17 to a family with an impressive record of producing high-value herd sires. Trace this pedigree another generation and you'll find BAR CK MS X38 106Z, the foundation behind some of the most influential genetics to come out of Keller Broken Heart Ranch.
- Her sire, RFS Roll Call, was the $50,000 standout selected by Gibbs Farms and STgenetics from Rydeen's 2024 sale. Roll Call brings another tremendous maternal line through WS Sweet Sixteen F16, whose influence extends through WS Enhancement 25H and WS Sweet Katch K4, the dam of ABS sire WS Marvel 8M. Combining the Medora and Sweet Sixteen families gives N17 an exceptional concentration of proven maternal genetics and breeding value.
- We are excited about the future of this female. With the pedigree to produce both influential herd sires and productive replacement females, N17 represents the kind of genetic opportunity we want to build around at River Creek Farms. When you stack this many proven cow families into one young female, the potential is hard to overlook.

		1%	1%	3%	15%	3%	1%	20%	1%	1%

- SCHOOLEY MISS 068H 513N comes from one of the most proven and profitable cow families in the Schooley Cattle Company program. When you study the production record behind this young female, it's hard not to get excited about the opportunity she represents. Two generations of exceptional females have consistently produced high-selling herd sires, combining tremendous growth, elite marbling and the kind of genetic consistency that makes a cow family truly valuable.
- Her dam, SCHOOLEY MISS 823F 068H, is a direct daughter of the great SCHOOLEY MISS 3000A 823F and a full sister to SCHOOLEY HAGGARD A411H, the $32,500 high seller we selected for River Creek Farms. Schooley Cattle Company has described 068H as the best percentage female their program has ever produced, and her production record certainly supports that statement. Her 11 sons have averaged over $25,000, an extraordinary accomplishment that speaks volumes about her ability to consistently generate valuable breeding bulls.
- Those sons include SCHOOLEY LIMITLESS, the $55,000 high seller selected by English Oaks Ranch; SCHOOLEY NEWSBOY, the $45,000 selection of Hart Simmentals; and SCHOOLEY NEWCOMER, who commanded $42,000 from Clearwater Simmentals and Lucky Penny. Add in SCHOOLEY NEWSREEL and SCHOOLEY MANHATTAN at $22,000 each, SCHOOLEY KHALID at $20,000 and SCHOOLEY LONGSHOT at $17,000. Every one of these bulls is a maternal brother to 513N. That's not just one standout calf. That's a cow proving herself year after year.
- The maternal strength doesn't stop there. Her granddam, SCHOOLEY MISS 3000A 823F, is responsible for Haggard, the $65,000 SCHOOLEY KROWN 28K and numerous other influential offspring. This is a family that has repeatedly turned genetic potential into real sale-ring results.
- Sired by RFS ROLL CALL, the $50,000 bull selected by Gibbs Farms and STgenetics, 513N brings another exciting genetic dimension to this already proven foundation. We know firsthand what this family can do through our investment in Haggard, and we're excited to build on that success with 513N. With this much production, maternal strength and proven marketability behind her, we believe she has every opportunity to become a cornerstone female in her own right.

- Introducing FC LADY FOREFRONT 8299-119, better known around here as “Honky Tonk Badonkadonk!” If you’ve seen the pictures of this female that set the internet on fire, you already know exactly why she earned that nickname. There are cows that photograph well, and then there are cows that make you stop scrolling and ask, “Who in the world is THAT?” She’s the kind you would draw up if someone asked you to design the perfect cow. Incredible body, tremendous shape, exceptional balance and a look that is nearly impossible to find fault with. She’s flat-out good, everywhere you look.
- And as impressive as she is phenotypically, her EPD profile might be even more exciting. She combines double-digit calving ease and negative birth weight with top 1% rankings for WW, YW, ADG, MWW and mature weight, along with top 3% $GN, top 2% DOC and $TI, top 10% marbling and top 30% $API. That is an extraordinary combination of calving ease, growth, carcass merit and physical quality in one female.
- Her pedigree is stacked with some of the Angus breed’s most respected genetics, including PINE VIEW FOREFRONT, G A R ASHLAND, G A R DAYLIGHT, G A R PREDESTINED 287L, HA COWBOY UP 5405, WILKS LADY 8299 and R B LADY STANDARD 305-02. These are genetics backed by generations of performance, maternal strength and cattle that look the part.
- We are offering two exciting embryo matings from 8299, one to TJ TAKE THAT 614M and the other to KBHR MONACO M021. Both bulls complement this female exceptionally well and give breeders two different opportunities to capitalize on her incredible combination of phenotype and genetic merit. Whether you’re looking to produce high-performance SimAngus herd sires or powerful, attractive replacement females, these matings offer tremendous potential.

- BAR 7 GREATER GOOD 206 1611 is a magnificent beast, blending tremendous power with a distinctly maternal build. Her structure starts at the ground with big feet, soft pasterns and an ideal set to her hock. She carries plenty of muscle through her rear quarter and moves with a long, fluid stride. Her exceptional udder quality, easy-fleshing ability and natural dimension complete the package. Angular yet powerful, she is the kind of cow that draws cattlemen and women straight to her.
- Her pedigree stacks G A R GREATER GOOD, G A R ASHLAND and G A R SURE FIRE A5008 on the top side, with 6P BLACKCAP 90206, SYDGEN ENHANCE, V A R DISCOVERY 2240 and CONNEALY CONFIDENCE 0100 on the maternal side. She ranks in the top 1% for WW, YW, ADG, $GN, MWW, MW and DOC; top 5% for MARB; top 15% for API; top 3% for TI; top 20% for MCE; top 25% for Milk; and top 35% for BW.
- We're producing as many embryos from 1611 as possible. We expect strong demand for her sons and intend to build our herd around her daughters. The embryos offered by KBHR Monaco M021 and TJ Take That 614M pair her cow power with two bulls we believe can produce something exceptional. These are matings with the potential to put a program on the map.

621C **1 Package of 3 Conventional Embryos sired by TJ Flex 699N**

- FF Rita 0S42 of 6558 7986 is the kind of Angus cow that makes designing composites fun. Zipper-fronted yet distinctly maternal, she has the right amount of chest, smooth shoulders and a wedge-shaped build that opens into a cavernous rib cage and powerful hip. Look closely at her picture and you'll also find ideal teat shape and size. She is a futuristic female with the maternal details we refuse to give up.
- Sired by EXAR Stallion 7986, she is out of a Basin Payweight 1682 daughter backed by Summitcrest Complete 1P55 and generations of Rita donors. In the Angus database, she ranks in the top 20% for CED, YH, HS and REA; top 10% for WW, CW, $AxH and $AxJ; top 3% for YW, CEM and $F; top 1% for RADG; top 30% for UDDR, DOC, Angle and $M; top 2% for MW and MH; top 35% for PAP; top 25% for MARB; top 15% for Fat, $G and $C; and top 5% for $B.
- We already know the W/C Headshot 957M mating works. We have a whole set of bull and heifer calves on the ground, most of them baldies, and they are outstanding. We're equally excited about her matings to TJ Flex 699N and KBHR Monaco M021. She has been a prolific embryo producer with strong pregnancy results, allowing us to offer all three combinations.
- 0S42 is a cow we love to keep in the donor pen and show visitors. We believe wholeheartedly in these matings and would welcome the resulting bull calves back to sell through our program.

1 Package of 3 IVF Embryos sired by KBHR Monaco M021 *SEXED FEMALE*

PLANNED MATING: 3/8 SIMMENTAL

CE	BW	WW	YW	MWW	DOC	CW	MRB	REA	$API	$TI
9.5	0.6	108	174.9	83.2	19.4	79	1.21	0.91	184.9	117.7
		1%	1%	1%	10%	1%	1%	20%	3%	1%

- When we set out to add a purebred Angus donor to our program, we weren't looking for just another good Angus female. We wanted one that could complement our Simmental genetics while producing functional, profitable cattle for both commercial cattlemen and seedstock producers. Whether the goal is low-percentage SimAngus cattle or building toward purebred genetics, we wanted a female with the phenotype, pedigree and genetic merit to make a lasting impact. B A R HAZEL 4765-070R checked every box.
- Hazel was our $19,500 top-selling heifer selection from our good friend Jim Brinkley's 2026 Brinkley Angus Ranch Spring Sale. From the ground up, she has more bone, shape and substance than you typically expect to find in an Angus female. She's the kind that catches your eye immediately, and the more you study her, the more you appreciate what she has to offer.
- Her Angus EPD profile is every bit as impressive as her phenotype. She ranks in the top 5% of the breed for $M, $G, $C, CLAW and MARB; top 10% for MILK, $W and UDDER; and top 15% for YW, $B and functional longevity. That combination of maternal strength, carcass quality, growth and structural traits is exactly what we were searching for.
- The maternal pedigree is where things get especially exciting. Hazel's dam is a flush sister to the $240,000 DEER VALLEY APACHE, and her maternal granddam is YON HAZEL F478, the $300,000 valuation donor for Deer Valley and Spruce Mountain. That is serious cow power, backed by a family that has already demonstrated tremendous value in the Angus breed.
- Now take that foundation and mate it to KBHR MONACO M021, bringing in another exceptional maternal line through KBHR MEDORA G132. We believe this combination offers tremendous potential to produce SimAngus cattle with the growth, carcass merit, structural quality and maternal strength today's cattle industry demands. Hazel is exactly the kind of female we wanted when we started searching for an Angus donor, and we're excited to offer genetics from a cow family with this much proven value behind it.

		2%	2%	4%	3%	2%	1%	20%	1%	1%

- KBHR MS SUGAR SUITE J102 is one of those females we've admired from the very beginning. We first spotted her in the open heifer pen at Keller Broken Heart Ranch and were so impressed with her phenotype that we tried to buy her privately before we even knew exactly who she was. That's how much we liked her. Once we studied her pedigree and realized she was a full sister to KBHR REVOLUTION H071, our appreciation for her only grew.
- Sugar Suite combines exceptional eye appeal with the kind of structural correctness and maternal quality we want in our donor females. She consistently transmits the white face, beautiful balance and nearly ideal structure to her offspring. Keller's have even retained one of her best sons to use on their front-end heifers, a tremendous endorsement of her production potential.
- Her pedigree brings in the influence of WS MISS SUGAR C4, one of the most important females behind the Revolution family. The mating to KBHR MONACO M021 adds another outstanding collection of proven cow families, including KBHR DAISEY K092, KBHR DEBUTANTE H113 and the legendary BAR CK MS X38 106Z. Few matings bring together this much of the maternal foundation that has helped shape the Keller Broken Heart Ranch program.
- We believe these embryos represent some of the very best genetics KBHR and River Creek Farms have to offer. With Sugar Suite's exceptional phenotype, proven maternal background and ability to transmit quality, combined with Monaco's growth, power and carcass merit, this is a mating we're extremely excited about. Whether you're looking for a future herd sire or a female to build a program around, this combination deserves serious consideration.

		2%	2%	10%	40%	2%	1%	25%	1%	1%

- KBHR J029 MS SUGAR HIGH is the kind of female that reminds us why we invest so heavily in proven cow families. Featured as Lot 2 in the Keller Broken Heart Ranch Heart of the Herd Dispersal, Sugar High combines tremendous pasture presence, exceptional body and the unmistakable look that made the legendary Sugar family famous. We have always admired females with this kind of substance and maternal quality, but what makes Sugar High especially exciting is her ability to consistently pass those traits on to her offspring.
- With the passing of WS MISS SUGAR C4, opportunities to carry forward the influence of this extraordinary maternal line become even more valuable. Sugar High is already building a production record that deserves attention. Her Gibbs Essential-sired daughter topped the open heifer offering at KBHR's spring sale and was selected by Werning Cattle Company, a tremendous endorsement of the quality this female can produce.
- For those who study the ASA Herdbook, Sugar High has another remarkable accomplishment to her credit. Her daughters sired by KBHR HOMELANDER J071 are the #1 SimAngus females for MRB with IMF scans from 9-12%, making them the highest-marbling SimAngus females in breed history. That's the kind of genetic progress that gets us excited, especially when it comes in cattle that still possess the body, structure and maternal function needed to thrive in the real world.
- Sired by CLRS GUARDIAN 317G and backed by the influence of HOOK'S XCELLENCE 87X, Sugar High combines proven maternal genetics with the ability to advance carcass merit without sacrificing phenotype. We are excited about the sons she will produce by leading Angus and Simmental sires in upcoming River Creek sales. We believe Sugar High has the potential to become an influential donor for our program, producing the kind of high-value herd sires and replacement females that keep customers coming back year after year.

Sire to Embryos Selling
KBHR MONACO M021 — $200,000 High-Selling SimAngus Bull

- HLTS SUGAR AND SPICE P7 brings together two of the most exciting genetic influences in the Hilltop program. A direct daughter of the legendary WS MISS SUGAR C4 and sired by the $200,000 44 VICTORY, this powerhouse ½ Simmental female combines an extraordinary maternal foundation with the growth, phenotype and carcass merit we are striving to produce.
- Sugar and Spice made an impression early, weaning off at an incredible 910 pounds. She has the body, muscle and performance to back up her pedigree, and we believe she has the potential to become a cornerstone female in our program. Her sire, 44 VICTORY, was the record-selling bull in the 2022 fall sale at 44 Farms and brings the influence of DB ICONIC, along with excellent feet, calving ease, growth and carcass quality.
- Now take that foundation and mate it to KBHR MONACO M021. This combination brings together the legendary WS MISS SUGAR C4 and KBHR MEDORA G132, two females whose influence reaches across some of the most exciting genetics in the Simmental breed. We believe Monaco's growth, power and marbling complement the tremendous maternal strength and performance already present in P7.
- What excites us most is the opportunity to produce cattle with the maternal foundation, phenotype and genetic merit to make an impact in both commercial and seedstock operations. With a 910-pound-weaning donor backed by two influential cow families, this is a mating we're extremely excited to offer. We believe these embryos have the potential to produce exceptional herd sires and the kind of replacement females that can build a program for generations.

- Two sisters, two separate embryo offerings, and one extraordinary cow family. HLTS/CLRWTR Sugar K5 (ASA #4158763) and Sugar Babe K7 (ASA # 4158792) bring together the legendary WS Miss Sugar C4 and the influence of ES A110 through their sire, ES Right Time FA110-4. These females represent the kind of maternal strength, phenotype and functionality we believe in at River Creek Farms.
- Sugar K5 is the more refined and beautifully balanced sister, with a tremendous udder, exceptional feet and the kind of structural correctness that makes a female stand out in any pasture. Sugar Babe K7 brings added body, rib and volume, packing tremendous substance into a powerful brood cow design. Both possess the qualities we look for in females capable of producing the next generation of elite herd sires and productive replacement females.
- Their pedigree is loaded with influential genetics. Their maternal family traces to WS Miss Sugar C4, while ES Right Time FA110-4 brings in the proven production of ES A110, a female whose embryos are also featured in this sale. Their family connections include KBHR Revolution H071, KBHR Ms Sugar Suite J102, KBHR Dakota L033 and their full brother HLTS/CLRWTR Ahead of Time K1.
- We have mated both sisters to KBHR Monaco M021, bringing another outstanding maternal foundation into the equation through KBHR Medora G132. These matings combine the Sugar family's maternal strength and physical quality with Monaco's growth, power and marbling potential. We are also looking forward to sons from these females by G A R Market Maker, FF Rito Ambitious and KA Kinsman in upcoming River Creek sales.

		10%	15%	20%	20%	5%	2%	4%	10%	2%

- W/C RJ Texas Doll 7058E is the kind of female whose pedigree and production record speak for themselves. One of the few full sisters to the influential W/C BANKROLL 811D and a direct daughter of the legendary MISS WERNING KP 8543U, Texas Doll combines exceptional power, flawless structure, tremendous rib shape and a square hip and pin set. She is the kind of cow that makes you appreciate what generations of intentional breeding can accomplish.
- But Texas Doll is much more than a pretty picture. With 20 progeny averaging over $13,000 and generating more than $260,000 in sales, she has proven her ability to produce cattle that command attention and bring real value. Her sons include W/C JOURNEYMAN 78M and W/C NEXT STEP 8587L, the 2024 AJSA National Classic Reserve Champion Bred and Owned Purebred Simmental Bull. Next Step was featured in Werning's 2025 sale and exhibited by Creighten Werning.
- Now combine that proven production with KBHR MONACO M021, a sire bringing tremendous growth, power and carcass merit to the table. We believe this mating has the potential to produce cattle with the elite phenotype Texas Doll is known for, while advancing the $API and $TI values that make genetics valuable to today's commercial cattlemen and seedstock producers alike. Opportunities to invest in a cow family with this much proven earning power don't come along every day!

CE	BW	WW	YW	MWW	DOC	CW	MRB	REA	$API	$TI
7.8	1.3	103.4	158.2	75.9	15.1	60.6	.76	1.15	167.7	107.8
		2%	3%	10%	25%	3%	3%	10%	10%	2%

- W/C MISS SEQUOIA 4110M is one of those females that makes you stop and look twice. Elegant through her front end, yet bold and expansive through her body, she combines the kind of eye appeal and substance that we believe separates a good female from a great one. She's beautifully balanced, powerful in her design and backed by a cow family that has already proven its value at the highest levels of the Simmental breed.
- Her dam, W/C MISS SEQUOIA 1003J, commanded $57,000 for half interest in Werning's 2023 production sale, joining the program of Cole and Talli Jackson. That puts a $114,000 implied valuation on her dam alone! Even more impressive, 1003J is a full sister to the $202,000 W/C BANK ON IT 273H, adding another proven high-value herd sire to this female's immediate family. Her maternal granddam, KS MISS SEQUOIA Y770, brings generations of maternal strength through the influential Sequoia cow family.
- Now take that foundation and mate it to KBHR MONACO M021. We are bringing together some of the most influential maternal genetics in the Simmental breed, combining Sequoia's elegance, body and proven cow family with Monaco's growth, power and marbling potential. We believe this mating has the ingredients to produce exceptional herd sires and the kind of replacement females that can anchor a program for generations. Opportunities to combine this much phenotype, maternal strength and genetic value don't come along every day!

PLANNED MATING: PUREBRED SIMMENTAL

CE	BW	WW	YW	MWW	DOC	CW	MRB	REA	$API	$TI
10.2	0.8	106.5	167.1	78.4	20.2	72.5	1.0	1.23	198.1	117.5
		1%	1%	4%	1%	1%	1%	4%	1%	1%

- CLRS Headdress 0107H was our pick of the mature cowherd at the Bred for Balance Dispersal, and she is exactly the kind of female we want representing River Creek Farms. With an impressive udder, outstanding disposition, tremendous bone, excellent hoof quality and structural integrity, Headdress brings together the practical traits that make cattle valuable for generations. Her EPD profile is equally impressive, ranking in the top 1% for DOC, top 2% for STAY, top 5% for REA, top 10% for CW and top 15% for MARB. We believe she has the potential to be among the elite purebred H-model cows when the updated $API and $TI evaluations are released.
- More importantly, Headdress has already proven she can produce the good ones! Her son, CLRS LINCOLN 0107, commanded $30,000 as the high-selling bull in the 2024 Bred for Balance Sale, and his full brother, CLRS MANIFEST 0107M, further demonstrates the consistency of this mating. Lincoln is already making his mark through daughters like HA NOVA 513N, the $25,000 female now residing at Keller's Broken Heart Ranch. We had the opportunity to see Nova this summer while making herd visits on our way to the Fall Focus, and she looked absolutely fantastic! The influence of CLRS HOMELAND 327H and the legendary HOOK'S XCELLENCE 87X adds another layer of maternal strength to this pedigree. Xcellence's influence throughout the Clear Springs program is remarkable, with 16 mature granddaughters featured in the Bred for Balance Mature Cowherd Dispersal.
- We don't add outside donors unless we believe they bring something truly special to our program, and Headdress certainly fits that description. Pairing her proven maternal excellence with the growth, carcass merit and genetic potential of KBHR MONACO M021 creates an exciting opportunity to produce elite purebred Simmental cattle with the phenotype, longevity and performance to make a lasting impact. We also want to thank Travis for his investment and commitment to flushing Monaco to his very best donor cows. That kind of confidence in a mating speaks volumes!

		2%	2%	3%	50%	1%	2%	10%	10%	1%

- ES Dakota Lily K62 is the kind of female that catches your eye the moment you walk into the pasture! Big, bold and powerful, this homozygous polled, blaze-faced beauty combines tremendous presence with the substance and structural quality we love in a donor female. Featured in Eichacker Simmentals' 2024 offering and selected by Hilltop Simmentals, Dakota Lily brings together an exceptional phenotype and a pedigree stacked with influential Simmental genetics. Eichacker described her as flashy, big, bold and powerful, and we couldn't agree more!
- Her sire, W/C FORT KNOX 609F, commanded $180,000 as the high-selling bull in Werning's 2019 sale. A son of W/C BANKROLL 811D and K-LER DOLLY'S QUEEN 609D, Fort Knox combines the legendary MISS WERNING KP 8543U cow family with the powerful Dolly maternal line. That is an impressive collection of genetics known for producing cattle with body, muscle, presence and tremendous value. On the maternal side, Dakota Lily's dam, ES E18, is a daughter of WS PRIME TIME B6 and traces to ES C72, a productive female who recorded a 105 weaning weight ratio on seven calves. That kind of consistency is exactly what we want behind the females we build our program around.
- Dakota Lily offers a tremendous opportunity to invest in a female that combines eye appeal, proven maternal productivity and some of the most recognizable bloodlines in the Simmental breed. With her powerful design, striking blaze face and generations of productive cows behind her, we believe she has the ingredients to produce cattle that stand out in the pasture and deliver where it counts. This is the kind of genetic foundation that can make an impact for generations!

		4%	4%	10%	25%	1%	1%	75%	10%	2%

- HSF Black Ice L262 was Hilltop's lead-off selection from Hofmann Simmental Farms' 2025 Burlap & Barbed Wire Sale, and she brings together the kind of phenotype, maternal strength and proven cow family that we love to build around at River Creek Farms. This impressive female combines tremendous body, structural quality and eye appeal with the practical traits that make a cow truly valuable. Her impeccable udder and quiet disposition are exactly what we look for in a donor female, and those qualities are no accident. They come from generations of cattle bred to work!
- Her dam, 7729, is a daughter of K C F BENNETT ABSOLUTE and has been a cornerstone of the Hofmann donor program for years. Her sons and daughters have consistently been money in the bank, making this a cow family with real production behind its reputation. Black Ice has inherited her dam's beautiful udder and outstanding temperament, two traits we place tremendous value on because they make a difference long after sale day.
- On the paternal side, Black Ice is a daughter of TJ STONE COLD 336G, Gibbs Farms' selection of the Frosty sons in Triangle J's 2020 bull sale. Sired by TJ FROSTY 318E and backed by the productive TJ 11D cow, Stone Cold is known for transmitting body, length, structural substance, excellent feet and quiet dispositions. His genetics are in extremely limited supply, making daughters like Black Ice even more intriguing. When you combine the proven maternal production of the Hofmann cow family with the structural quality and functionality of Stone Cold, you have the kind of genetic foundation we believe can make a lasting impact. Black Ice is a female we are extremely excited to build around, and we believe her best days are still ahead of her!

		4%	10%	10%	40%	3%	2%	15%	15%	2%

- KC2 MISS NIKKI THE VICKI brings together two cow families with a history of producing high sellers and champions. Her sire, STCC TECUMSEH 058J, commanded $620,000 for 1/2 semen interest in the 2022 Hartman Cattle Company Bull Sale, selling to Freking Cattle of Minnesota.
- Tecumseh's dam, HF Serena, has generated nearly $3 million in progeny sales, with more than 230 progeny registered with ASA. Her offspring include $150,000 and $100,000 sellers, along with champions at the NWSS, NAILE and AJSA National Classic. That family has repeatedly delivered cattle with exceptional quality and market appeal.
- Nikki's dam, HPF VICTORIA B396E, was a featured open heifer in the historic Hudson Pines Dispersal in Sleepy Hollow, New York. A champion as an open heifer, bred heifer and cow-calf pair, she carried her influence beyond the show ring by producing high-selling females, bulls and champions.
- Nikki has power in the blood from both sides of her pedigree. Mated to KBHR MONACO M021, she offers an exciting opportunity to combine generations of elite phenotype with his growth, muscle and marbling. This mating has the potential to produce an exceptionally built Purebred Simmental heifer with the genetic merit to match.

		4%	10%	10%	40%	3%	2%	15%	15%	2%

- NXT Chrystal N526 is a stunning Revelation 2K daughter with the presence and build to command attention. Revelation sired both the 2025 American Royal Supreme Champion Open Breeding Heifer for Breckyn Bloomberg and the Supreme Champion Junior Heifer for Chloee Clark. N526 was an early visitor favorite at Hartman Cattle Company, drawing attention from breeders who appreciate the details required to compete at the highest level.
- Her dam, NXT Chrystal, is a W/C Relentless 32C daughter tracing to NXT Redemption E701, the 2017 NAILE Spring Heifer Calf Champion for Ty and Ellie Drach of Illinois. Her maternal pedigree also brings together Shawnee Miss 770P and JM BF H25, two of the Simmental breed's most influential herd sire-producing donors.
- Among the females offered in Hartman's 2025 Customer Appreciation Sale, N526 stood apart with her elevated front end, stout foot and bone, and tremendous mass and capacity. Her flexible movement, loose spine and striking proportions earned her a place in the donor pen. She combines a futuristic look with proven cow power, making her an exciting female to build around.

- An up-and-coming Hilltop donor HLTS Velvet P20 brings together KBHR REVOLUTION H071 with generations of proven maternal strength. Mated to KBHR MONACO M021, pairs deep cow family foundations with his growth, power and elite marbling.
- Velvet P20 carries 11 consecutive donors in her maternal line. Her pedigree traces through Swain Velvet 607S, a CNS Dream On L186 daughter out of Swain Queen 403P, then back to SSS-SCF Mindy 178H and CEZS Black Mindy. With 158 progeny recorded with ASA, Black Mindy anchors a family whose production and phenotype have influenced respected programs for generations.
- This matings stack Revolution's maternal influence and Monaco's performance over cow families that have repeatedly earned their place in the donor pen. Generations of proof and an exciting opportunity to produce the next generation of herd sires and donor cows.

		4%	5%	2%	25%	2%	2%	15%	1%	1%

- Selected from Triangle J in 2024, 112M brings generations of maternal history together in one pedigree. Stacking proven cow families has been a cornerstone of River Creek's breeding program, and this female fits that approach perfectly.
- Her sire, KBHR Bold Ruler, is earning recognition across the country for the quality of his daughters. Her dam, TJ 95A, filled Darby's replacement pen and heifer offering year after year. TJ 95A also produced TJ BLACK ICE 451H and TJ LOGICAL 597M, both featured in the 2026 Triangle J Semen Directory.
- The mating to KBHR Monaco M021 adds another exceptional maternal line through the renowned Medora cow family at Keller Broken Heart Ranch. This combination offers exciting donor potential with the genetic merit to compete among the best.
- Her first flush to SCHOOLEY HAGGARD A411H produced several sons headed for development and daughters destined for the replacement pen. She has also demonstrated exceptional embryo production, yielding 27 and 29 Grade 1 embryos in her first two flushes.

- LCDR 227M was the Williams Brothers and Taylor Farms $18,000 pick from Lazy C Diamond's 2025 sale, and she exemplifies the value of stacking proven cow families. She is a direct daughter of LCDR Miss Gia 5G, dam of LCDR Diligence, LCDR Ms Jane 4J and other standouts. Her paternal granddam is WS MISS SUGAR C4, who appears again deeper in her maternal pedigree.
- This mating combines the potential for exceptional phenotype with figures that demand attention. Planned mating projections rank in the top 1% for WW, YW, MARB, API and TI, with four additional traits in the top 5% or better. Proven cow power and elite genetic merit make this an exciting opportunity to produce the next generation of herd sires and donor females.

		10%	10%	15%	30%	10%	3%	30%	10%	3%

- TDD Haven 0610 comes from Angus royalty, combining the influence of PVF Insight 0129 and Bush's Unbelievable 423. Her paternal grandsire, PVF Insight 0129, makes a substantial move in the ASA's new research index release, improving from the 95th percentile to the top 35% for API and from the 99th percentile to the top 3% for TI.
- Her maternal pedigree stacks S A V BISMARCK 5682, S A V FINAL ANSWER 0035, S A V NET WORTH 4200, S A V 8180 TRAVELER 004, C R A BEXTOR 872 5205 and GDAR SVF TRAVELER 234D. That foundation brings together the power, presence and style to produce standout SimAngus cattle.
- 0610 offers a strong starting point for a planned crossbreeding program. Her offspring can provide a foundation for higher-percentage Angus SimAngus cattle, with the flexibility to use higher-percentage Simmental sires in subsequent generations to produce 1/2 or 5/8 SM cattle. Proven Angus cow power gives this family value across several breeding directions.
